Why Choose Bott

INDUSTRY
EXPERIENCE

The Bott Group was established over 80 years ago, and although our experience has grown our values and ideals have remained constant throughout

To develop high quality solutions which create added value.

This is one of the reasons why customers come back to Bott again and again.

ENVIRONMENTAL
RESPONSIBILITY

We believe that society must take responsibility for the environment.

Green technologies such as rainwater harvesting, energy efficient manufacturing plant, solar power, intelligent lighting and waste stream recycling show how we are reducing our impact.

CUSTOM DESIGN
AND BUILD

As part of our service we visit you to understand your requirements, working to create a 3D simulation of your proposed solution.

Because we have a wide range of products and the extra flexibility that comes from manufacturing ourselves, we can create a solution tailored to your specific needs.

To finish the process we can install the units so you're ready for work.

RIGOROUS TESTING

Before any Bott product goes on sale it undergoes a rigorous testing regime ranging from saltwater spray to load and wear tests.

So when you choose a Bott workshop storage product, you can be sure that it's fit for purpose and have 100% confidence in its durability.

COMPREHENSIVE RANGE

At Bott we've invested heavily in flexible manufacturing capability

This enables us to make most products to order and offer a comprehensive range combined with short lead times.

From benches, to CNC storage to heavy duty cupboards we're confident we have the product to suit your needs.

MAXIMUM CAPACITY

Bott products have exceptionally high capacities from 200kg drawer options to 1 tonne rated benches.

Other design features such as 100% extension drawer slides and optimised frameworks maximise usable space.

All Bott products are designed for use in demanding conditions and built to last

BLOODHOUND SSC

Bott has proudly supported the BLOODHOUND SSC project from its inception as a product sponsor and has supplied workshop equipment to the team. When we first heard about the project we thought it was a fantastic opportunity to showcase British engineering and innovation and a way to inspire young people to follow a career in engineering.

To showcase the project in our local community Bott and Bloodhound partnered to host an educational day for local school children at our factory in Cornwall.

We've also got involved in making the car making the titanium stringers which form part front floor pan of the supersonic car on our press brake machines.

"2016 will see the BLOODHOUND SSC team shipping out to the Hakskeen Pan in the Northern Cape, South Africa, to embark on the land speed record attempt. Some of our Bott workshop equipment will be joining us in the desert, an environment unlike any other it's experienced before. The kit will have to withstand long transportation, heat, dust and constant heavy use by the engineers."

"We're very pleased to have Bott's continued support as we approach a hugely exciting time for the team."

Tony Parraman, Head of Sponsor Liaison.
BLOODHOUND SSC.

Ricardo Performance Products

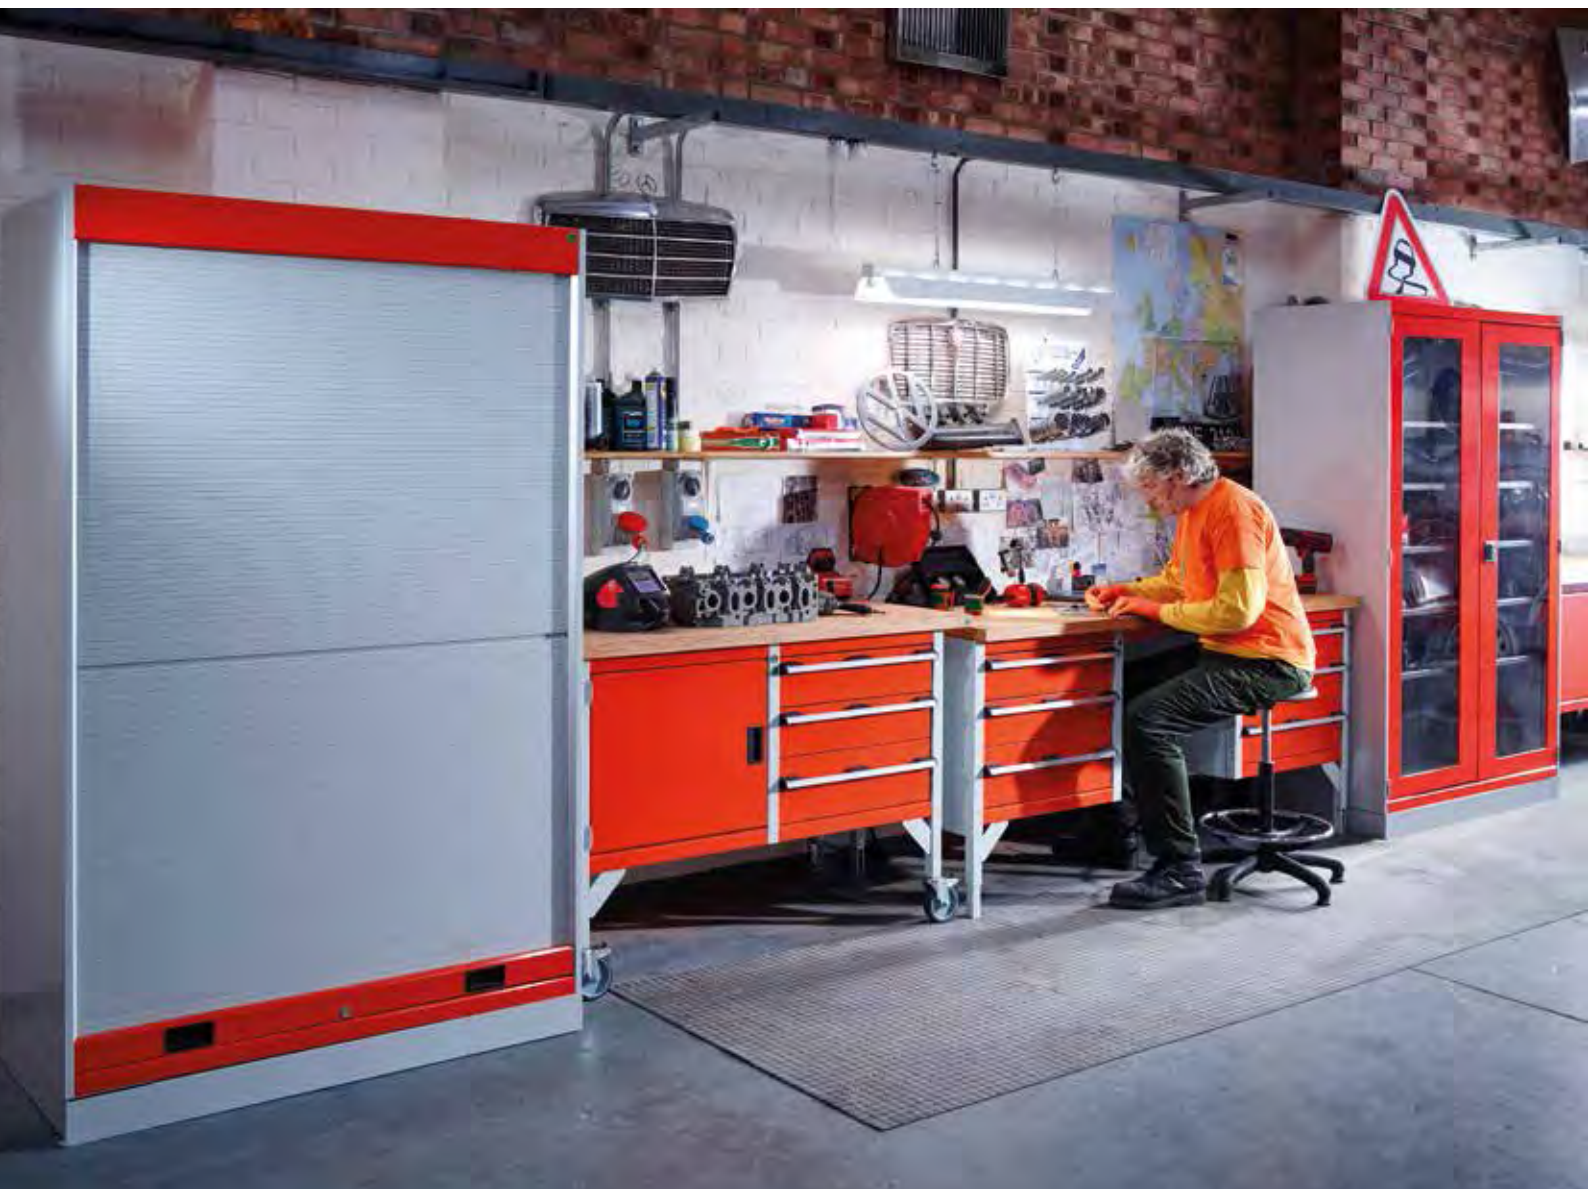

The Ricardo team needed a working environment in their high performance manufacturing assembly facility which was clean and well organised to support the assembly of precision components.

“We approached Bott with an initial idea for what we wanted; the team at Bott then created a 3D design proposal. The equipment was then manufactured and installed to support our requirement. Given the exacting nature of our work we need a very well organised and tidy workplace to ensure we successfully deliver to our clients, the Bott equipment and design process has given us a truly professional workshop.”

Daniel Hall, Senior Manager.
Ricardo UK

Wheeler Dealers

"When we were kitting out our new workshop for the latest series of Wheeler Dealers I wanted to get some professional quality equipment so I got in contact with a great British manufacturer called Bott.

The show can be pretty chaotic, so I need a well organised environment where it's easy to find both tools and parts. The Bott equipment makes this a reality

Everything Bott make is guaranteed for 10 years so if you're going to take on any kind of project make sure your workshop is kitted out with proper quality equipment, we have and it makes all the difference"

Edd China, co presenter Wheeler Dealers.

Features & Benefits

Robust Housing

Bott cubio cabinets have reinforced steel housings with up to 1 tonne total capacity.

Huge range of plan sizes and heights.

50kg Drawers

Standard fitment drawers are 50kg U.D.L. capacity with full 100% extension roller bearing slides and scuff resistant galvanised pans.

Dividers

Tough, sub dividable plastic troughs. Removable plastic boxes and adjustable metal dividers allow multiple separation possibilities for efficient and tidy storage.

Drawer Blocking & Locking

All cabinets are equipped with a blocking mechanism to prevent more than one drawer from being opened at a time.

Drawer safety interlocks prevent accidental opening whilst in transit even if unlocked.

Worktops & Toptrays

To prevent roll off mobile cabinets are fitted with a top tray with four raised sides and quality inlaid mat.

40mm thick multiplex or lino faced worktops are also available for Bott cubio maintenance trolleys.

Castors

High quality castors are used throughout the range. Swivel and brake versions enhance mobility and stability.

Tool Holding Inserts

The core of the system are the easy fit tool holding inserts.

50, 75 or 100mm wide depending on model, they simply clip into the metal carrier or frame.

To calculate the insert capacity compare the tool type sections with the available sections per row in the metal carrier or holder.

A blank holder is available for other tool sizes. The solid plug is removed for machining to the required bore dimensions.

All inserts have a taper bore except VDI models. Top diameter shown.

The insert sits 32mm above the metal carrier or holder.

Tool Carrier - Drawer Brackets

For high volume storage with ease of access and security CNC tooling may be stored in one of the bott cubio static or mobile cabinets.

The cabinets will accept either the tool carrier block via drawer brackets (below) or direct into the tool frame (opposite).

Both systems will work with a wide selection of cabinet sizes, the ideal model will depend upon the length and quantity of tooling.

Please ask for a no obligation quote or on site consultation to discuss your requirements.

Cabinets

see pages 24 - 61

Tool Carrier - Drawer Brackets

Tool carriers may be mounted within the drawers using the accessory bracket set. The ideal cabinet is 800mm wide x 650mm deep but the system will work with the larger sizes.

Up to 3 carriers may be stored in each drawer.

800mm x 650mm cabinet with carrier brackets.

Carriers locate onto the drawer brackets.

Drawer frames are available in 80 and 125mm heights to suit the tooling shank length. Choose a cabinet drawer front height large enough to accommodate your tooling's overall length.

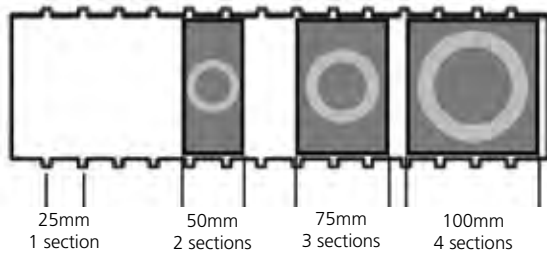

Frames fit neatly into drawers.

Empty drawer frame, add required inserts.

Drawer frames are also available for cupboards, see page 177.

Any combination of CNC inserts may be used together in a single row up to the maximum number of sections per row.
