

## Lista Premium 75/200

Drawer cabinets, workbenches and partition material

## For professionals, custom-made

### The new product line, Lista Premium

**Lista Premium fulfils every requirement. The freely configurable drawer cabinets and workbenches have the flexibility to be adapted to suit your needs. For example, Lista Premium is available in two new carrying capacity classes: the previously available model for 200 kg per drawer and now the new capacity for 75 kg. And as if those aren't enough innovations: with Lista Premium, all drawers come with full extension.**

#### Lista Premium offers the best

High quality for your specifications: As specialists in your field, you make the highest demands on the quality of your work environment. And from the planning stage to installation you also expect extensive customisation options. With Lista Premium you can be assured of excellent quality. Aside from high quality, you also have the flexibility to configure as you need. There is a choice in the housing size, the size and arrangement of drawers, the colour, the locking system, the individual drawer partition materials and much more.

#### New: Lista Premium 75 and Lista Premium 200

Choice of two carrying capacity classes: The carrying capacity of 200 kg per drawer has been essential for the metal processing industry, some commercial operations and many types of workshops. Hence Lista has been their long-term product of choice. However, in many areas, for example in medicine, the watch industry, laboratories or museums, the goods to be stored are considerably lighter. That is why we now offer new Lista Premium 75 – with all the advantages of Lista Premium 200 but with only 75 kg carrying capacity per drawer to suit your needs.

#### All drawers with full extension

There is one area where Lista Premium does not offer you a choice: All cabinets come exclusively with full drawer extension. This way you can make use of the available space right down to the last square centimetre. The entire drawer contents are easily accessible at any time.

#### Security in capital letters

Our great selection is rounded off by the many options which the locking system makes possible. Whether key, number combination or electronic locking with hand-held transmitter: You have the choice!

**Those who want the best choose without compromise: Lista Premium!**

Lista Premium means: high quality freely configurable drawer cabinets and workbenches.

Lista Premium means: choice of drawer carrying capacity 75 kg or 200 kg.

Lista Premium means: all drawers with full extension!

## Making Workspace Work

### Lista – an overview

Lista produces drawer systems and furnishing components in five production plants and sells them around the world.

**Time is money. Space is money. As a leading manufacturer of drawer cabinets, Lista brings order and efficiency to the workplace.**

#### **Efficiency at the workplace**

Lista drawer cabinets made of indestructible sheet steel and the matching workbenches are the favourites of industry and commercial operations. Whether in the assembly hall or workshop, in the research laboratory, museum or hospital, in the components warehouse or showroom: Lista excels where tools, stored items and small components need to be available securely, in a space-saving way, clearly arranged and ready at hand.

#### **Investment security**

Those who invest in Lista plan for the future: Our uncompromising quality ensures durability. And the modular nature of our products gives the flexibility of expansion of your existing product configurations as and when your requirements change.

#### **Individual customer support**

You can depend on our expert advice for the custom design of your workplace!

## 10-year guarantee

With Lista Premium you know you have the best

**We use exclusively high-quality materials for our Lista Premium product line. Strength, durability and functional design are the result of decades of experience and innovation.**

### **Lista security can be gauged**

ISO 9001, ISO 14001: The certification of our production processes and services is very important to us. That is why adherence to international standards is a matter of course for us. We only promise what we can deliver. And we deliver more than we promise.

### **10-year guarantee**

You can trust in our quality products. That is why we give our customers a 10-year guarantee (workbench tops 1 year) on the entire Lista Premium product line.

### **Delivery according to your specifications**

You configure your required products including the interior. We build every drawer cabinet and every workbench according to your customised order and deliver it to you immediately after completion.

Certified in compliance with ISO 9001, ISO 14001

10-year guarantee

## Free choice and good advice

We will be happy to show you how

**As a freely configurable product line, Lista Premium can be adapted to meet your individual needs like a properly tailored suit. You can take advantage of our broad range of experience at any time so that everything goes smoothly with this wide selection.**

### User friendly catalogues

We make every effort to ensure that the path from complex task to flexible solution can be travelled smoothly. It begins with this catalogue, which introduces you to our configuration system in a direct, systematic and clearly arranged way. This will enable you to arrive at your individual product through easy steps. Naturally you can always take advantage of our advice. Because with us, the more selection possibilities there are, the more important the good advice!

### Expertise through experience

Our expert consultants belong to the best in the business. This isn't surprising though, because Lista teams have established their high level of expertise over many years. So, with us your needs and expectations are in the best hands. We draw from a deep well of experience and can quickly provide proven practical solutions.

### Wishes granted

Lista embodies modular configurability in steel. Which means simply that, with Lista Premium, you get drawer cabinets and workbenches that fulfil your exact requirements.

### A secure future

Quality lasts. In view of the durability of Lista products, this fact is a major buying point. In addition you can continue to expand your Lista products modularly for many years to come.

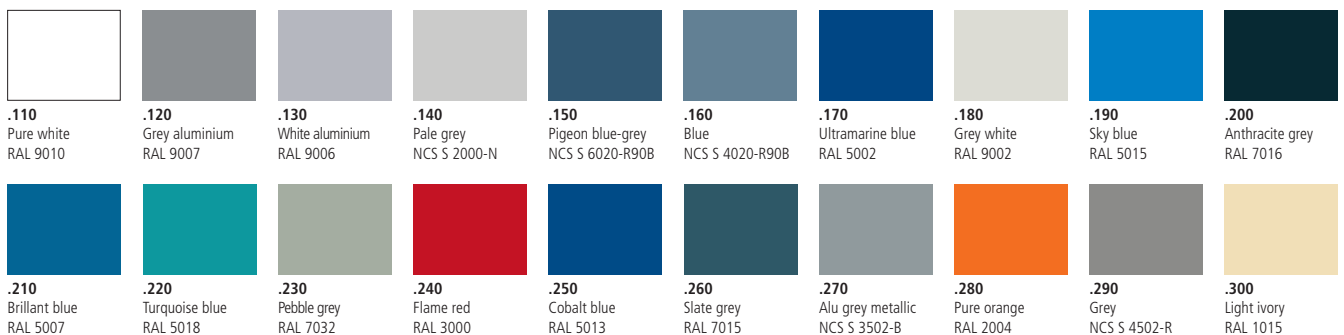

## Lista Premium The colours

### Lista Premium is available in 10 standard colours.

The three-digit colour code (e.g. **.010**) is a component of the article number. Always complete the article number of your order with the desired colour code (e.g. 70.701.**010**).

### A further 20 colours are available for a surcharge of 10%.

Differences between these colour samples and the original colours may occur for reasons of a printing-technical nature. Other colours are available by request. Please contact us for a price quote!

## Lista Premium drawer cabinets

Those who want the best choice without compromise

Lista Premium drawer cabinets made of sheet steel offer excellent quality from A to Z. The configuration possibilities in size, colour, locking, features and drawer arrangement are virtually unlimited. The new carrying capacity class gives the system even more flexibility. In brief: Lista Premium drawer cabinets offer the best of everything.

### New areas of application

Lista Premium drawer cabinets are available as ever with a carrying capacity of 200 kg per drawer. Now our customers also have the option of a carrying capacity class of 75 kg. This allows us to offer our drawer cabinet for entirely new areas of application. The needs of numerous areas of application are easily fulfilled with 75 kg per drawer.

The versatile drawer partition material allows arrangements which perfectly match the parts to be stored.

### All drawers with full extension

We offer full extension of drawers exclusively with all Lista Premium drawer cabinets. This way access to everything is quick and uncomplicated. The rail castors are made of POM. This allows the same mechanical properties as steel castors yet with smoother running drawers. And a further detail: With our popular labelling system, Lista Script, not only drawers and partition material can be labelled, but now also the housing. Take a closer look at our Lista Premium drawer cabinets on the following pages. You'll see: It's worth it!

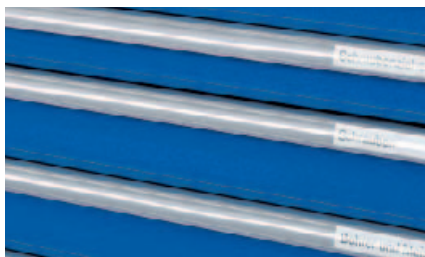

## Lista Premium drawer cabinets

### Customised innovation

#### All drawers with full extension

The differential extension, guided without a crossbar, ensures perfectly quiet running – even when the stored materials are very heavy. Moreover, it allows full extension, which is why you also have easy access to parts that have been placed right at the back of the drawer.

#### Drawer fronts

All drawer handle strips have covers on the sides and are flush with the cabinet housing on the front. This not only has a great appearance, but it also prevents injury.

#### Impact-proof paint finish

Lista Premium 75/200 is available in 10 standard colours and (for a surcharge) in 20 further colours. The environmentally friendly powder coating ensures impact-proof and abrasion resistant surfaces. Drawers are dip-painted and thus have optimal corrosion protection.

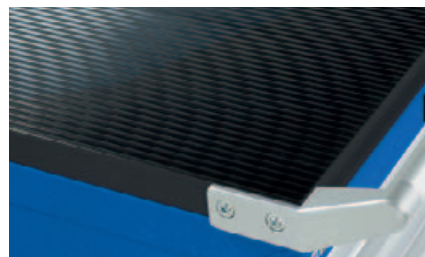

#### Central locking system

All drawer cabinets have a patented central locking system that simultaneously locks all drawers.

#### Unmatched: Lista Script

All drawers can be labelled easily, cleanly and systematically using the innovative handle fitted with a transparent viewing window. Even the drawer partition material offers good labelling options. Now you can also label the housing. Further support is available for labelling: the free-of-charge, downloadable software, Lista Script. Information about the matching blank slide-in labels is provided in this catalogue near the respective partition material.

#### Covers

Rubber ribbed mats, as desired with or without retainer top.

#### Safety blocking system

As standard feature, the single-drawer blocking system blocks all other drawers when one drawer is pulled out. This provides reliable protection against the toppling of the cabinet.

#### Mobile cabinets

Our mobile drawer cabinets can feature a retainer top with raised edges on four sides, black ribbed mat as well as two fixed and two steering castors. The steering castors are fitted with a parking brake. Mobile cabinets must be fitted with a drawer safety catch.

#### Base

The base allows the height of the drawer cabinet to be adjusted. Drawer cabinets beginning at a certain size can make use of a pallet base. This allows the cabinet to be moved with a forklift truck.

#### Electronic locking system

With Code Lock, a number combination replaces the key. Due to the battery powered operation, the system is independent of an external power supply. On page 17 you will find a detailed overview of all options which are available for this.

#### Punch out

All body tops are supplied with perforated holes. This allows any cabinets to have a table top or a second cabinet stacked on top of it at a later stage.

#### Drawer safety catch

Four different safety systems for mobile cabinets guarantee safety for mobile cabinets and also for more demanding requirements:

**With safety catch on the right** (per drawer), a catch is mounted under the drawer handle. This kind of drawer safety catch is standard for all mobile cabinets.

For extreme loads in mobile setups (container, trailer or vehicles) we offer three special solutions:

The **drawer safety catch on the right and left** is opened with two hands.

The same applies for the **double safety catch** which offers the advantage that it can be operated with one hand.

**The Lilo safety device** (Lock-in – Lock-out) blocks the drawer in an open or closed state. Drawer extensions have a strip which engages when the drawer is fully extended and blocks the drawer. The same happens when the drawer is closed. This prevents – especially with heavy loads – unintentional closing of the drawer.

#### Partition material

For the sake of orderliness the drawer partition materials have been standardised and thus can be put to use right through the cross section of the Premium assortment. Matching partition material is offered by Lista for each drawer size.

## Lista Premium drawer cabinets

### The locking systems

**The Lista locking systems are put to use where tools, work pieces and stored goods require optimum security.**

#### Key Lock

Standard locking with the central locking system and cylinder lock comes with two keys. The patented lock secures all drawers simultaneously. Only one key type fits per drawer cabinet (separately lockable). Upon request you can also receive one key type for multiple cabinets (one key for all locks). For this feature please choose the body option "Standard lock without cylinder", in addition, the desired equivalent cylinder should be ordered.

#### Code Lock

Here the key is replaced with a number combination. A four-to-six-digit number combination is adequate to open the Lista drawer cabinets. Using a master code, up to 20 individual user codes can be programmed and individually deleted again at any time. This means, in an operation with several people, an individual access system can be created for all cabinets fitted with Code Lock.

Code Lock operates using battery power and is hence independent of the mains supply.

#### Remote Lock and Remote Lock Mobile

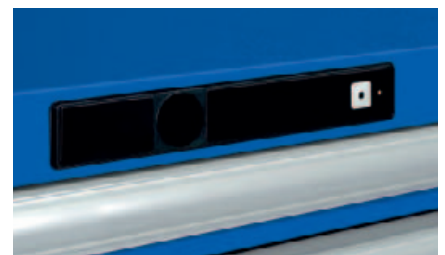

Remote Lock and its mobile twin work as an electronic locking system with hand-held radio transmitter. Unlocking is done through a radio signal. You assign access privileges using a programming key. It is also possible using the appropriate components to interlink two or more cabinets. You decide whether the connected cabinets lock individually (2 pin connecting element) or together (4 pin). Remote Lock is connected to the mains supply, while Remote Lock Mobile is fitted with a rechargeable battery.

Standard locking, Key Lock, with key and cylinder lock.

Code Lock, the practical lock with number combination.

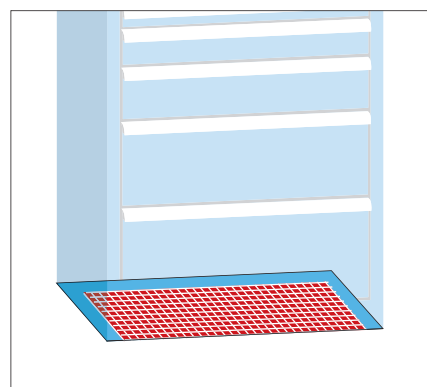

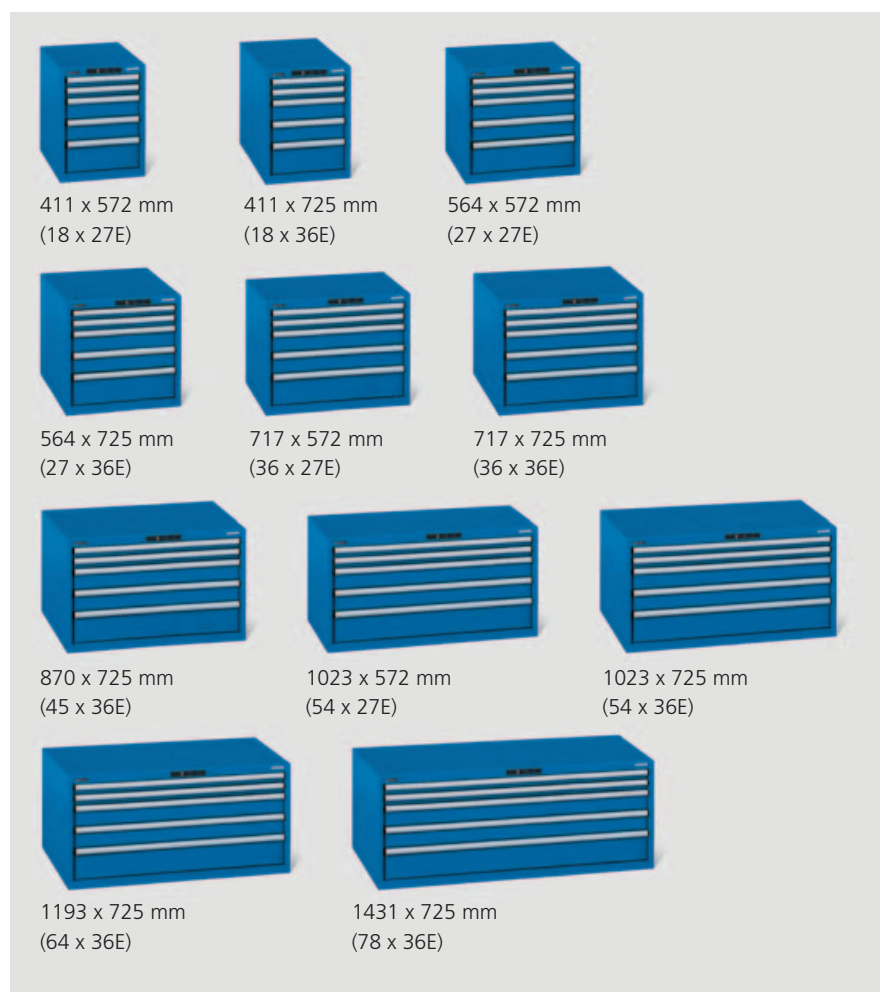

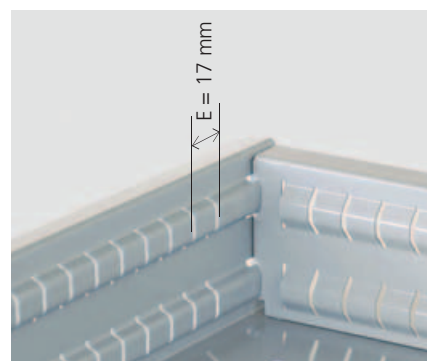

Remote Lock, the programmable, electronic lock with hand-held radio transmitter.

## Listra Premium drawer cabinets

### Selection of the base area

#### The clever measurement system

When selecting a drawer cabinet, first specify the size of the base area. The overview below helps with this selection. The base area determines the useable dimension of the drawer. We indicate both mm measurements as well as Lista units (E) in this catalogue. For the housing, the mm measurements of the base area correspond to width x depth (e.g. 411 x 572 mm); with drawers, to the useable dimension (e.g. 306 x 459 mm). Lista units (E) are a practical representation of the basic grid. They serve to define the clear relationship between housing, drawer and partition material. With the example above, the housing and the drawers that fit in this housing have identical Lista units, namely 18 x 27E, although they have different millimetre measurements. A Lista unit (E) equals 17 mm and is based on the grid division for the drawer partitioning.

- Useable drawer dimension, based on the grid module E.
- Housing base area, based on the grid module E.

Listra units (E) give housing, drawer and drawer partitions a common point of reference.

### Configuration examples

## Listra Premium drawer cabinets

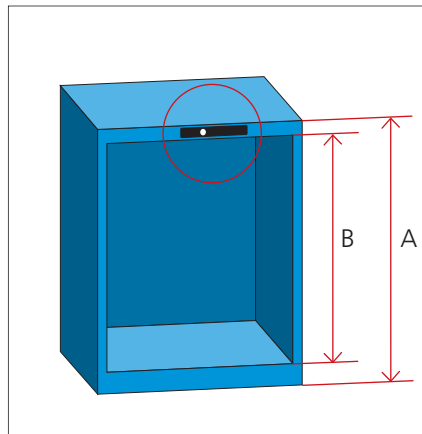

Width 411 mm, depth 572 mm (18 x 27E)

**Configuration instructions: this is how to put your drawer cabinet together.**

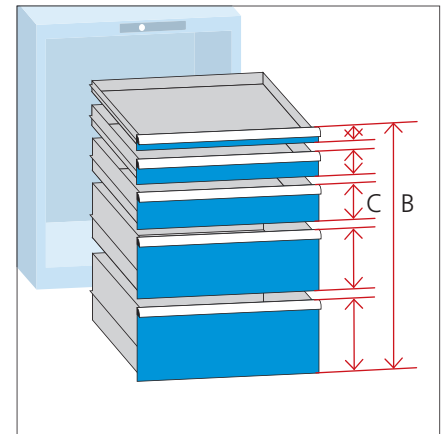

### 1. Selection of the cabinet base area

The first step is the selection of the cabinet base area. It can be indicated in millimetres (width x depth) or Lista units (E x E). The measurements E x E indicate which drawers match which housings.

### 2. Selection of housing and locking system

After selecting a base area you can specify the housing. Different heights are available for every floor plan. The selection of housing always includes the choice of the desired locking system and colour.

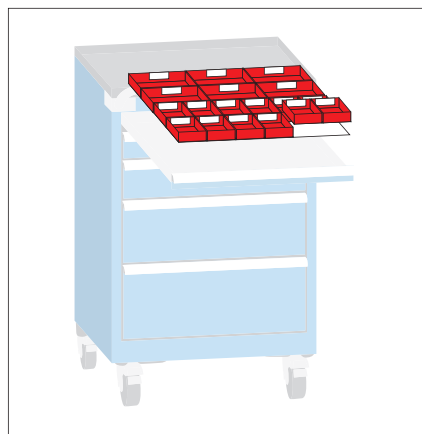

### 3. Selection of drawers

Determine the front height, carrying capacity, and colour of the drawers. The sum total of the front heights C must correspond to the clear height B (refer to figure in point 2). Please also select the type of safety catch.

### 4. Selection of accessories

The drawer cabinet can be combined with hinged door, plain shelves and pull-out shelves. Further housing accessories (cover, base, wheels and push handle for mobile cabinets) are also available. Mobile cabinets must be fitted with a drawer safety catch.

### 5. Selection of partition material

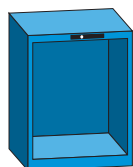

Partition material for drawers is usually ordered as a set. The available selection is large. Please note: The partition material must match the drawer height and useable dimension.

### 6. Determination of the price

The price of the drawer cabinet corresponds to the sum of all selected elements in the corresponding configuration.

### The Lista housing locks

#### Key Lock

Standard closure with central locking system and Lista cylinder lock, individual lock, with 2 keys.

#### Code Lock

Electronic locking system, a number combination replaces the key. Programmable user codes allow a flexible locking system to be created. Battery powered.

#### Remote Lock

Electronic locking system with hand-held radio transmitter (unlocking through radio pulse). A programming key grants access and authorisation. Interlinking of cabinets possible using interlink elements. Connects to main supply (adapter necessary). Please note: hand-held radio transmitter, programming key and adapter not included. Can be ordered optionally if required.

#### Remote Lock Mobile

Same functionality as Remote Lock, but with rechargeable battery (requirement for mobile model). Hand-held radio transmitter and programming key not included. Can be ordered optionally if required.

#### Lock without cylinder

Lock to be included in complete locking systems (simultaneously or main locking systems). For cylinders ordered with predefined lock numbers (2C 1 – 2C 6) or a freely defined number (2C \_). Should a cylinder not be ordered, the housing will be supplied with a lock cover.

For further information on locking systems see page 17.

## The Lista drawer safety catch

### Standard

Standard model without drawer-locking facility.

### Safety catch on the right

Mobile cabinets must be fitted with a drawer safety catch. Prevents unintended opening of drawers even when the cabinet is not locked.

### Safety catch on the right and left as well as double safety catch

Increased safety for use on mobile equipment. Safety catch right and left, operated with both hands. Double catch centrally operated with one hand.

## Lista Premium drawer cabinets

Width 411 mm, depth 725 mm (18 x 36E)

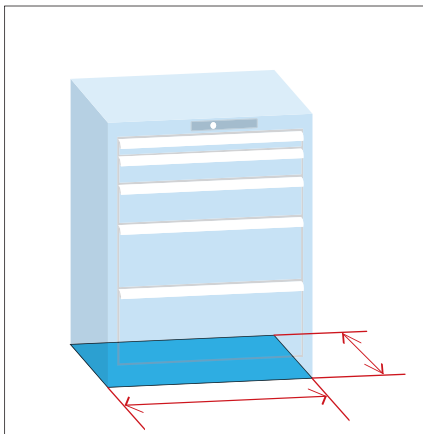

### Configuration examples

## Listra Premium drawer cabinets

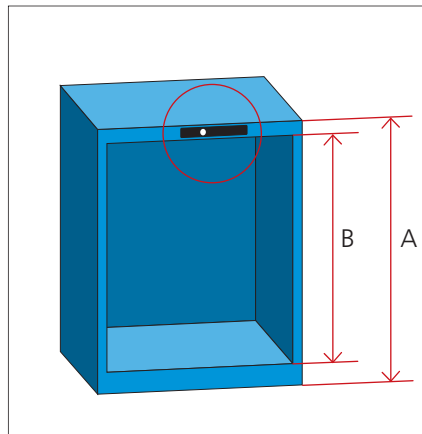

Width 411 mm, depth 725 mm (18 x 36E)

**Configuration instructions: this is how to put your drawer cabinet together.**

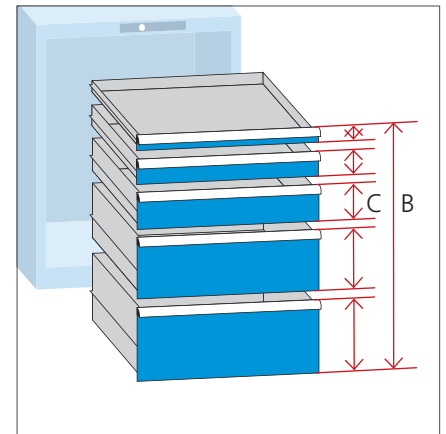

### 1. Selection of the cabinet base area

The first step is the selection of the cabinet base area. It can be indicated in millimetres (width x depth) or Lista units (E x E). The measurements E x E indicate which drawers match which housings.

### 2. Selection of housing and locking system

After selecting a base area you can specify the housing. Different heights are available for every floor plan. The selection of housing always includes the choice of the desired locking system and colour.

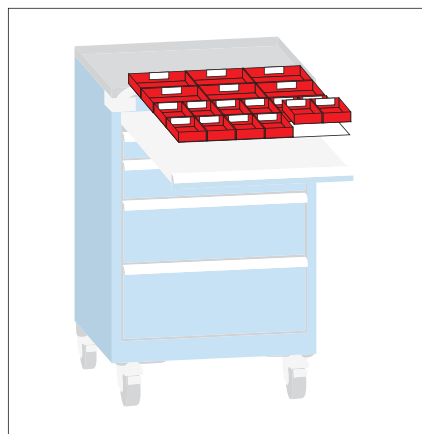

### 3. Selection of drawers

Determine the front height, carrying capacity, and colour of the drawers. The sum total of the front heights C must correspond to the clear height B (refer to figure in point 2). Please also select the type of safety catch.

### 4. Selection of accessories

The drawer cabinet can be combined with hinged door, plain shelves and pull-out shelves. Further housing accessories (cover, base, wheels and push handle for mobile cabinets) are also available. Mobile cabinets must be fitted with a drawer safety catch.

### 5. Selection of partition material

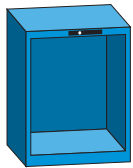

Partition material for drawers is usually ordered as a set. The available selection is large. Please note: The partition material must match the drawer height and useable dimension.

### 6. Determination of the price

The price of the drawer cabinet corresponds to the sum of all selected elements in the corresponding configuration.

### The Lista housing locks

#### Key Lock

Standard closure with central locking system and Lista cylinder lock, individual lock, with 2 keys.

#### Code Lock

Electronic locking system, a number combination replaces the key. Programmable user codes allow a flexible locking system to be created. Battery powered.

#### Remote Lock

Electronic locking system with hand-held radio transmitter (unlocking through radio pulse). A programming key grants access and authorisation. Interlinking of cabinets possible using interlink elements. Connects to main supply (adapter necessary). Please note: hand-held radio transmitter, programming key and adapter not included. Can be ordered optionally if required.

#### Remote Lock Mobile

Same functionality as Remote Lock, but with rechargeable battery (requirement for mobile model). Hand-held radio transmitter and programming key not included. Can be ordered optionally if required.

#### Lock without cylinder

Lock to be included in complete locking systems (simultaneously or main locking systems). For cylinders ordered with predefined lock numbers (2C 1 – 2C 6) or a freely defined number (2C \_). Should a cylinder not be ordered, the housing will be supplied with a lock cover.

For further information on locking systems see page 17.

## The Lista drawer safety catch

### Standard

Standard model without drawer-locking facility.

### Safety catch on the right

Mobile cabinets must be fitted with a drawer safety catch. Prevents unintended opening of drawers even when the cabinet is not locked.

### Safety catch on the right and left as well as double safety catch

Increased safety for use on mobile equipment. Safety catch right and left, operated with both hands. Double catch centrally operated with one hand.

## Lista Premium drawer cabinets

Width 564 mm, depth 572 mm (27 x 27E)

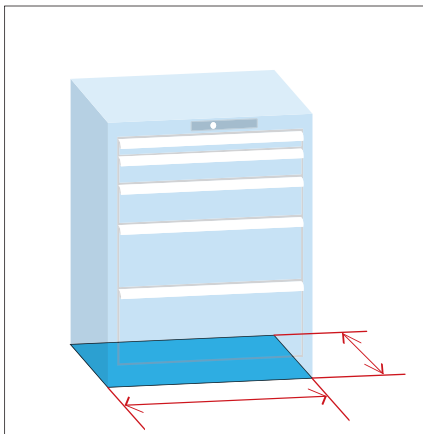

### Configuration examples

## Lista Premium drawer cabinets

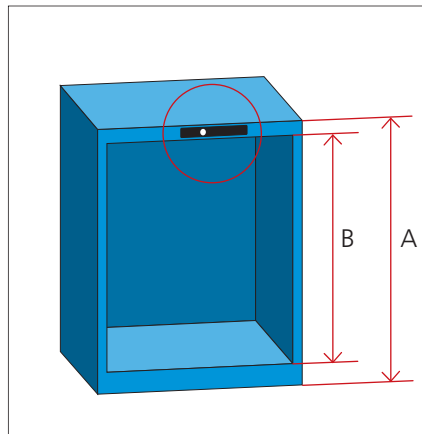

Width 564 mm, depth 572 mm (27 x 27E)

**Configuration instructions: this is how to put your drawer cabinet together.**

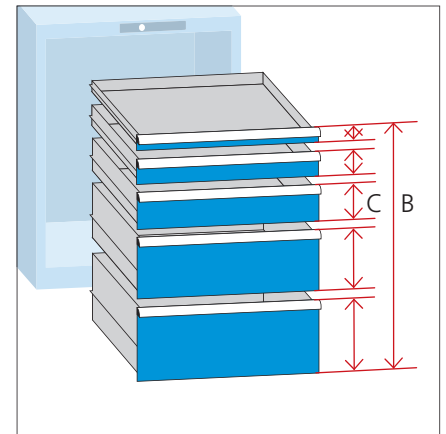

### 1. Selection of the cabinet base area

The first step is the selection of the cabinet base area. It can be indicated in millimetres (width x depth) or Lista units (E x E). The measurements E x E indicate which drawers match which housings.

### 2. Selection of housing and locking system

After selecting a base area you can specify the housing. Different heights are available for every floor plan. The selection of housing always includes the choice of the desired locking system and colour.

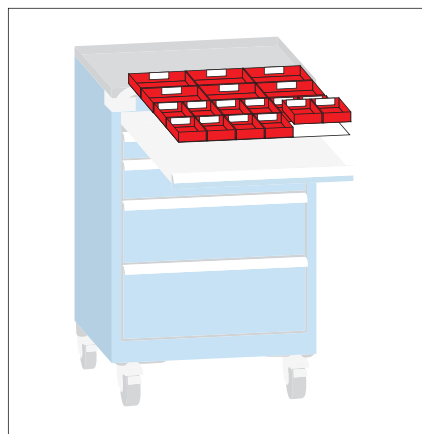

### 3. Selection of drawers

Determine the front height, carrying capacity, and colour of the drawers. The sum total of the front heights C must correspond to the clear height B (refer to figure in point 2). Please also select the type of safety catch.

### 4. Selection of accessories

The drawer cabinet can be combined with hinged door, plain shelves and pull-out shelves. Further housing accessories (cover, base, wheels and push handle for mobile cabinets) are also available. Mobile cabinets must be fitted with a drawer safety catch.

### 5. Selection of partition material

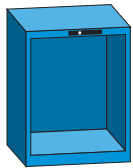

Partition material for drawers is usually ordered as a set. The available selection is large. Please note: The partition material must match the drawer height and useable dimension.

### 6. Determination of the price

The price of the drawer cabinet corresponds to the sum of all selected elements in the corresponding configuration.

### The Lista housing locks

#### Key Lock

Standard closure with central locking system and Lista cylinder lock, individual lock, with 2 keys.

#### Code Lock

Electronic locking system, a number combination replaces the key. Programmable user codes allow a flexible locking system to be created. Battery powered.

#### Remote Lock

Electronic locking system with hand-held radio transmitter (unlocking through radio pulse). A programming key grants access and authorisation. Interlinking of cabinets possible using interlink elements. Connects to main supply (adapter necessary). Please note: hand-held radio transmitter, programming key and adapter not included. Can be ordered optionally if required.

#### Remote Lock Mobile

Same functionality as Remote Lock, but with rechargeable battery (requirement for mobile model). Hand-held radio transmitter and programming key not included. Can be ordered optionally if required.

#### Lock without cylinder

Lock to be included in complete locking systems (simultaneously or main locking systems). For cylinders ordered with predefined lock numbers (2C 1 – 2C 6) or a freely defined number (2C \_). Should a cylinder not be ordered, the housing will be supplied with a lock cover.

For further information on locking systems see page 17.

## The Lista drawer safety catch

### Standard

Standard model without drawer-locking facility.

### Safety catch on the right

Mobile cabinets must be fitted with a drawer safety catch. Prevents unintended opening of drawers even when the cabinet is not locked.

### Safety catch on the right and left as well as double safety catch

Increased safety for use on mobile equipment. Safety catch right and left, operated with both hands. Double catch centrally operated with one hand.

### Lilo locking device

The Lilo locking device (Lock-in – Lock-out) blocks the drawer in an open or closed state. A significant security and comfort benefit, especially for heavy loads.

## Lista Premium drawer cabinets

Width 564 mm, depth 725 mm (27 x 36E)

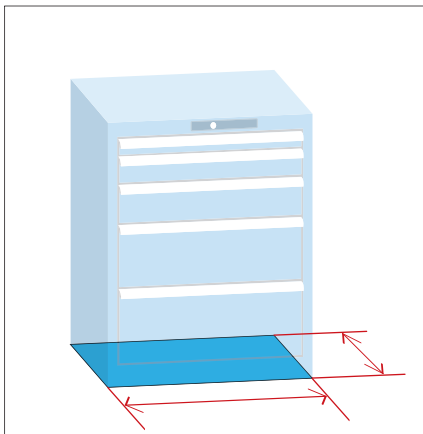

### Configuration examples

## Lista Premium drawer cabinets

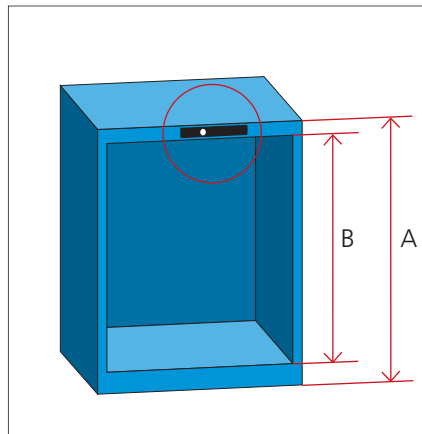

Width 564 mm, depth 725 mm (27 x 36E)

**Configuration instructions: this is how to put your drawer cabinet together.**

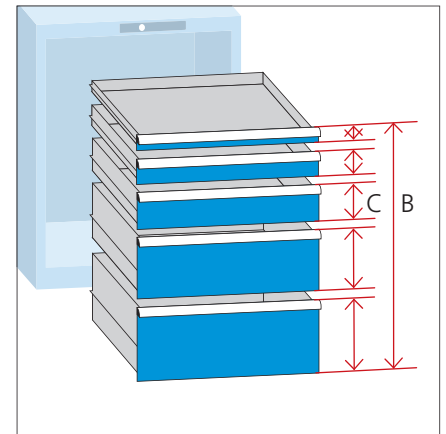

### 1. Selection of the cabinet base area

The first step is the selection of the cabinet base area. It can be indicated in millimetres (width x depth) or Lista units (E x E). The measurements E x E indicate which drawers match which housings.

### 2. Selection of housing and locking system

After selecting a base area you can specify the housing. Different heights are available for every floor plan. The selection of housing always includes the choice of the desired locking system and colour.

### 3. Selection of drawers

Determine the front height, carrying capacity, and colour of the drawers. The sum total of the front heights C must correspond to the clear height B (refer to figure in point 2). Please also select the type of safety catch.

### 4. Selection of accessories

The drawer cabinet can be combined with hinged door, plain shelves and pull-out shelves. Further housing accessories (cover, base, wheels and push handle for mobile cabinets) are also available. Mobile cabinets must be fitted with a drawer safety catch.

### 5. Selection of partition material

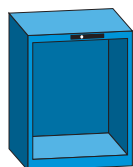

Partition material for drawers is usually ordered as a set. The available selection is large. Please note: The partition material must match the drawer height and useable dimension.

### 6. Determination of the price

The price of the drawer cabinet corresponds to the sum of all selected elements in the corresponding configuration.

#### Remote Lock

Electronic locking system with hand-held radio transmitter (unlocking through radio pulse). A programming key grants access and authorisation. Interlinking of cabinets possible using interlink elements. Connects to main supply (adapter necessary). Please note: hand-held radio transmitter, programming key and adapter not included. Can be ordered optionally if required.

#### Remote Lock Mobile

Same functionality as Remote Lock, but with rechargeable battery (requirement for mobile model). Hand-held radio transmitter and programming key not included. Can be ordered optionally if required.

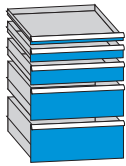

#### Lock without cylinder

Lock to be included in complete locking systems (simultaneously or main locking systems). For cylinders ordered with predefined lock numbers (2C 1 – 2C 6) or a freely defined number (2C \_). Should a cylinder not be ordered, the housing will be supplied with a lock cover.

For further information on locking systems see page 17.

## The Lista drawer safety catch

### Standard

Standard model without drawer-locking facility.

### Safety catch on the right

Mobile cabinets must be fitted with a drawer safety catch. Prevents unintended opening of drawers even when the cabinet is not locked.

### Safety catch on the right and left as well as double safety catch

Increased safety for use on mobile equipment. Safety catch right and left, operated with both hands. Double catch centrally operated with one hand.

### Lilo locking device

The Lilo locking device (Lock-in – Lock-out) blocks the drawer in an open or closed state. A significant security and comfort benefit, especially for heavy loads.

## Lista Premium drawer cabinets

Width 717 mm, depth 572 mm (36 x 27E)

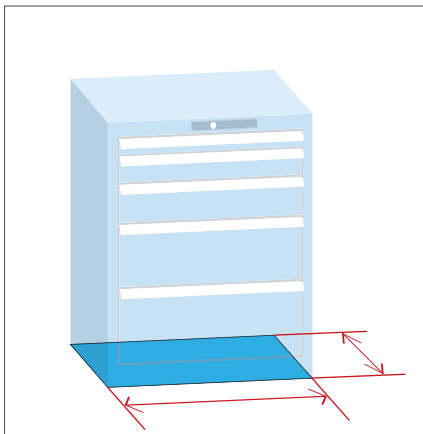

### Configuration examples

## Lista Premium drawer cabinets

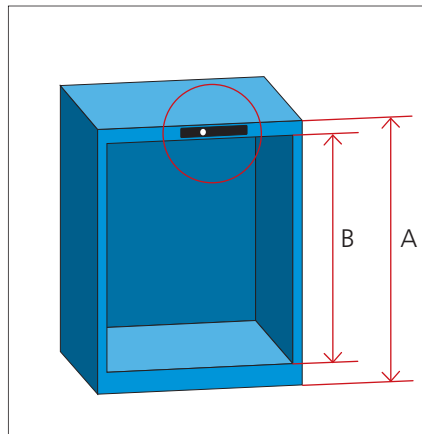

Width 717 mm, depth 572 mm (36 x 27E)

**Configuration instructions: this is how to put your drawer cabinet together.**

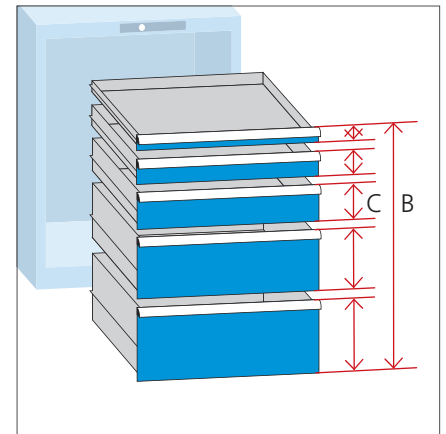

### 1. Selection of the cabinet base area

The first step is the selection of the cabinet base area. It can be indicated in millimetres (width x depth) or Lista units (E x E). The measurements E x E indicate which drawers match which housings.

### 2. Selection of housing and locking system

After selecting a base area you can specify the housing. Different heights are available for every floor plan. The selection of housing always includes the choice of the desired locking system and colour.

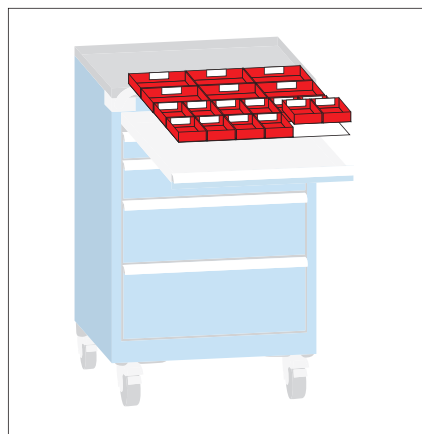

### 3. Selection of drawers

Determine the front height, carrying capacity, and colour of the drawers. The sum total of the front heights C must correspond to the clear height B (refer to figure in point 2). Please also select the type of safety catch.

### 4. Selection of accessories

The drawer cabinet can be combined with cover, base, wheels and push handle for mobile cabinets. Mobile cabinets must be fitted with a drawer safety catch.

### 5. Selection of partition material

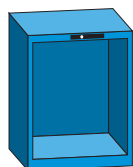

Partition material for drawers is usually ordered as a set. The available selection is large. Please note: The partition material must match the drawer height and useable dimension.

### 6. Determination of the price

The price of the drawer cabinet corresponds to the sum of all selected elements in the corresponding configuration.

### The Lista housing locks

#### Key Lock

Standard closure with central locking system and Lista cylinder lock, individual lock, with 2 keys.

#### Code Lock

Electronic locking system, a number combination replaces the key. Programmable user codes allow a flexible locking system to be created. Battery powered.

#### Remote Lock

Electronic locking system with hand-held radio transmitter (unlocking through radio pulse). A programming key grants access and authorisation. Interlinking of cabinets possible using interlink elements. Connects to main supply (adapter necessary). Please note: hand-held radio transmitter, programming key and adapter not included. Can be ordered optionally if required.

#### Remote Lock Mobile

Same functionality as Remote Lock, but with rechargeable battery (requirement for mobile model). Hand-held radio transmitter and programming key not included. Can be ordered optionally if required.

#### Lock without cylinder

Lock to be included in complete locking systems (simultaneously or main locking systems). For cylinders ordered with predefined lock numbers (2C 1 – 2C 6) or a freely defined number (2C \_). Should a cylinder not be ordered, the housing will be supplied with a lock cover.

For further information on locking systems see page 17.

## Lista Premium drawer cabinets

Width 717 mm, depth 725 mm (36 x 36E)

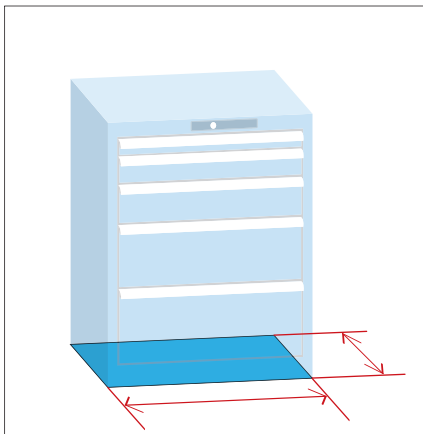

### Configuration examples

## Lista Premium drawer cabinets

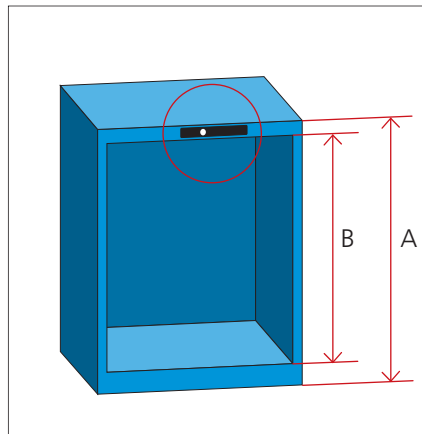

Width 717 mm, depth 725 mm (36 x 36E)

**Configuration instructions: this is how to put your drawer cabinet together.**

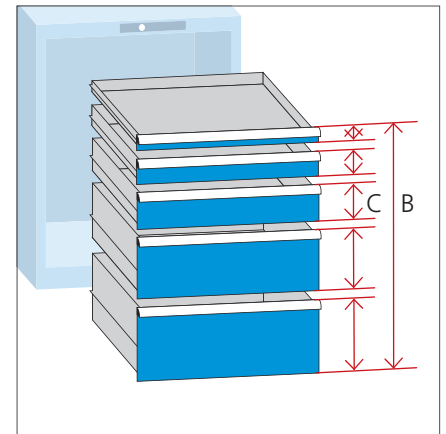

### 1. Selection of the cabinet base area

The first step is the selection of the cabinet base area. It can be indicated in millimetres (width x depth) or Lista units (E x E). The measurements E x E indicate which drawers match which housings.

### 2. Selection of housing and locking system

After selecting a base area you can specify the housing. Different heights are available for every floor plan. The selection of housing always includes the choice of the desired locking system and colour.

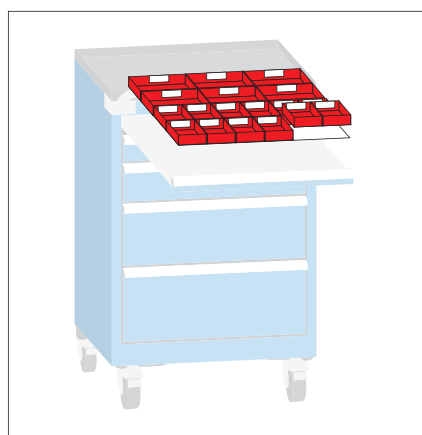

### 3. Selection of drawers

Determine the front height, carrying capacity, and colour of the drawers. The sum total of the front heights C must correspond to the clear height B (refer to figure in point 2). Please also select the type of safety catch.

### 4. Selection of accessories

The drawer cabinet can be combined with cover, base, wheels and push handle for mobile cabinets. Mobile cabinets must be fitted with a drawer safety catch.

### 5. Selection of partition material

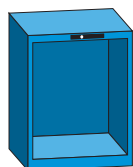

Partition material for drawers is usually ordered as a set. The available selection is large. Please note: The partition material must match the drawer height and useable dimension.

### 6. Determination of the price

The price of the drawer cabinet corresponds to the sum of all selected elements in the corresponding configuration.

### The Lista housing locks

#### Key Lock

Standard closure with central locking system and Lista cylinder lock, individual lock, with 2 keys.

#### Code Lock

Electronic locking system, a number combination replaces the key. Programmable user codes allow a flexible locking system to be created. Battery powered.

#### Remote Lock

Electronic locking system with hand-held radio transmitter (unlocking through radio pulse). A programming key grants access and authorisation. Interlinking of cabinets possible using interlink elements. Connects to main supply (adapter necessary). Please note: hand-held radio transmitter, programming key and adapter not included. Can be ordered optionally if required.

#### Remote Lock Mobile

Same functionality as Remote Lock, but with rechargeable battery (requirement for mobile model). Hand-held radio transmitter and programming key not included. Can be ordered optionally if required.

#### Lock without cylinder

Lock to be included in complete locking systems (simultaneously or main locking systems). For cylinders ordered with predefined lock numbers (2C 1 – 2C 6) or a freely defined number (2C \_). Should a cylinder not be ordered, the housing will be supplied with a lock cover.

For further information on locking systems see page 17.

## Lista Premium drawer cabinets

Width 870 mm, depth 725 mm (45 x 36E)

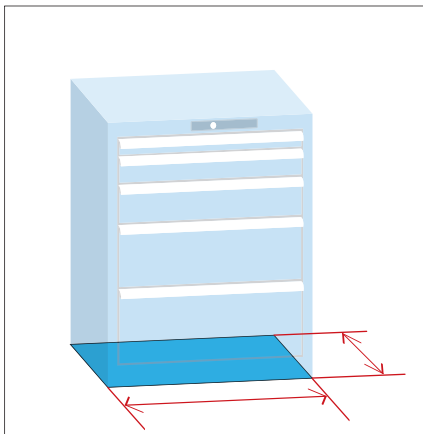

### Configuration examples

## Lista Premium drawer cabinets

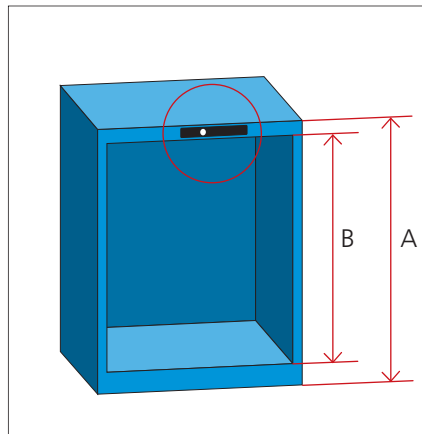

Width 870 mm, depth 725 mm (45 x 36E)

**Configuration instructions: this is how to put your drawer cabinet together.**

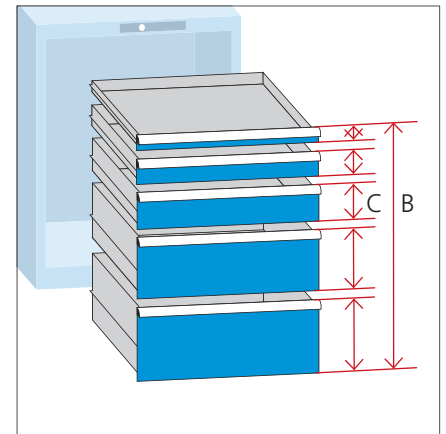

### 1. Selection of the cabinet base area

The first step is the selection of the cabinet base area. It can be indicated in millimetres (width x depth) or Lista units (E x E). The measurements E x E indicate which drawers match which housings.

### 2. Selection of housing and locking system

After selecting a base area you can specify the housing. Different heights are available for every floor plan. The selection of housing always includes the choice of the desired locking system and colour.

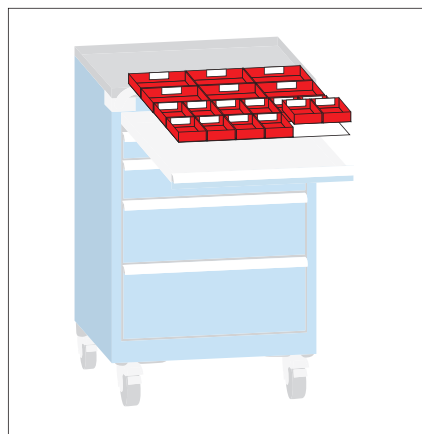

### 3. Selection of drawers

Determine the front height, carrying capacity, and colour of the drawers. The sum total of the front heights C must correspond to the clear height B (refer to figure in point 2). Please also select the type of safety catch.

### 4. Selection of accessories

The drawer cabinet can be combined with cover, base, wheels and push handle for mobile cabinets. Mobile cabinets must be fitted with a drawer safety catch.

### 5. Selection of partition material

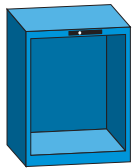

Partition material for drawers is usually ordered as a set. The available selection is large. Please note: The partition material must match the drawer height and useable dimension.

### 6. Determination of the price

The price of the drawer cabinet corresponds to the sum of all selected elements in the corresponding configuration.

### The Lista housing locks

#### Key Lock

Standard closure with central locking system and Lista cylinder lock, individual lock, with 2 keys.

#### Code Lock

Electronic locking system, a number combination replaces the key. Programmable user codes allow a flexible locking system to be created. Battery powered.

#### Remote Lock

Electronic locking system with hand-held radio transmitter (unlocking through radio pulse). A programming key grants access and authorisation. Interlinking of cabinets possible using interlink elements. Connects to main supply (adapter necessary). Please note: hand-held radio transmitter, programming key and adapter not included. Can be ordered optionally if required.

#### Remote Lock Mobile

Same functionality as Remote Lock, but with rechargeable battery (requirement for mobile model). Hand-held radio transmitter and programming key not included. Can be ordered optionally if required.

#### Lock without cylinder

Lock to be included in complete locking systems (simultaneously or main locking systems). For cylinders ordered with predefined lock numbers (2C 1 – 2C 6) or a freely defined number (2C \_). Should a cylinder not be ordered, the housing will be supplied with a lock cover.

For further information on locking systems see page 17.

## The Lista drawer safety catch

### Standard

Standard model without drawer-locking facility.

### Safety catch on the right

Mobile cabinets must be fitted with a drawer safety catch. Prevents unintended opening of drawers even when the cabinet is not locked.

### Safety catch on the right and left as well as double safety catch

Increased safety for use on mobile equipment. Safety catch right and left, operated with both hands. Double catch centrally operated with one hand.

### Lilo locking device

The Lilo locking device (Lock-in – Lock-out) blocks the drawer in an open or closed state. A significant security and comfort benefit, especially for heavy loads.

## Lista Premium drawer cabinets

Width 1023 mm, depth 572 mm (54 x 27E)

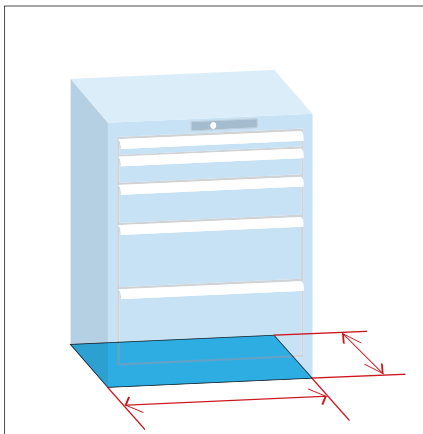

### Configuration examples

## Listra Premium drawer cabinets

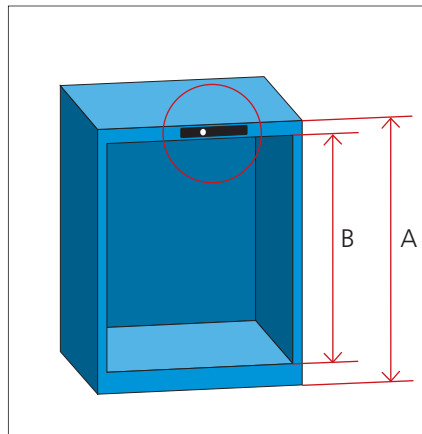

Width 1023 mm, depth 572 mm (54 x 27E)

**Configuration instructions: this is how to put your drawer cabinet together.**

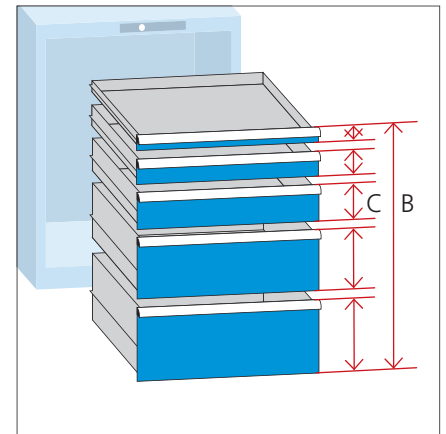

### 1. Selection of the cabinet base area

The first step is the selection of the cabinet base area. It can be indicated in millimetres (width x depth) or Lista units (E x E). The measurements E x E indicate which drawers match which housings.

### 2. Selection of housing and locking system

After selecting a base area you can specify the housing. Different heights are available for every floor plan. The selection of housing always includes the choice of the desired locking system and colour.

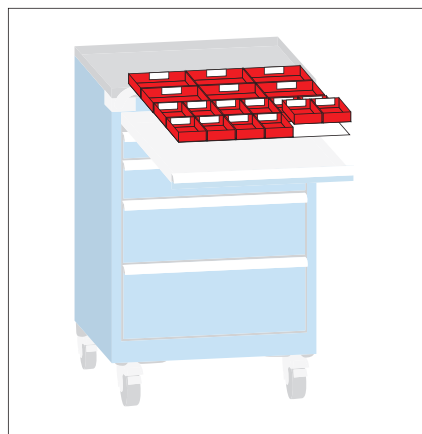

### 3. Selection of drawers

Determine the front height, carrying capacity, and colour of the drawers. The sum total of the front heights C must correspond to the clear height B (refer to figure in point 2). Please also select the type of safety catch.

### 4. Selection of accessories

The drawer cabinet can be combined with cover, base, wheels and push handle for mobile cabinets. Mobile cabinets must be fitted with a drawer safety catch.

### 5. Selection of partition material

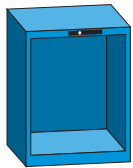

Partition material for drawers is usually ordered as a set. The available selection is large. Please note: The partition material must match the drawer height and useable dimension.

### 6. Determination of the price

The price of the drawer cabinet corresponds to the sum of all selected elements in the corresponding configuration.

## The Lista housing locks

### Key Lock

Standard closure with central locking system and Lista cylinder lock, individual lock, with 2 keys.

### Code Lock

Electronic locking system, a number combination replaces the key. Programmable user codes allow a flexible locking system to be created. Battery powered.

### Remote Lock

Electronic locking system with hand-held radio transmitter (unlocking through radio pulse). A programming key grants access and authorisation. Interlinking of cabinets possible using interlink elements. Connects to main supply (adapter necessary). Please note: hand-held radio transmitter, programming key and adapter not included. Can be ordered optionally if required.

### Remote Lock Mobile

Same functionality as Remote Lock, but with rechargeable battery (requirement for mobile model). Hand-held radio transmitter and programming key not included. Can be ordered optionally if required.

### Lock without cylinder

Lock to be included in complete locking systems (simultaneously or main locking systems). For cylinders ordered with predefined lock numbers (2C 1 – 2C 6) or a freely defined number (2C \_). Should a cylinder not be ordered, the housing will be supplied with a lock cover.

For further information on locking systems see page 17.

## The Lista drawer safety catch

### Standard

Standard model without drawer-locking facility.

### Safety catch on the right

Mobile cabinets must be fitted with a drawer safety catch. Prevents unintended opening of drawers even when the cabinet is not locked.

### Safety catch on the right and left as well as double safety catch

Increased safety for use on mobile equipment. Safety catch right and left, operated with both hands. Double catch centrally operated with one hand.

### Lilo locking device

The Lilo locking device (Lock-in – Lock-out) blocks the drawer in an open or closed state. A significant security and comfort benefit, especially for heavy loads.

## Lista Premium drawer cabinets

Width 1023 mm, depth 725 mm (54 x 36E)

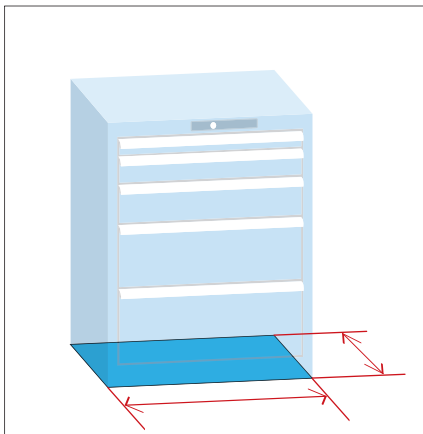

### Configuration examples

## Lista Premium drawer cabinets

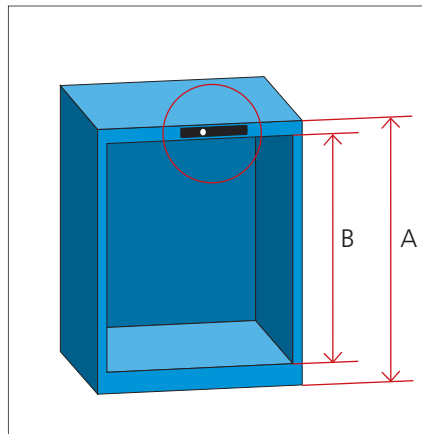

Width 1023 mm, depth 725 mm (54 x 36E)

**Configuration instructions: this is how to put your drawer cabinet together.**

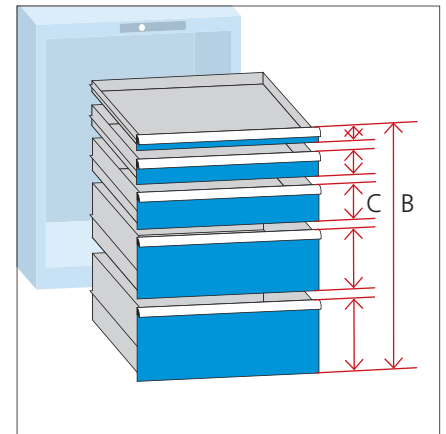

### 1. Selection of the cabinet base area

The first step is the selection of the cabinet base area. It can be indicated in millimetres (width x depth) or Lista units (E x E). The measurements E x E indicate which drawers match which housings.

### 2. Selection of housing and locking system

After selecting a base area you can specify the housing. Different heights are available for every floor plan. The selection of housing always includes the choice of the desired locking system and colour.

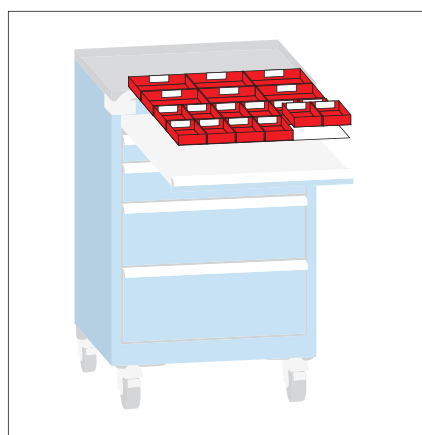

### 3. Selection of drawers

Determine the front height, carrying capacity, and colour of the drawers. The sum total of the front heights C must correspond to the clear height B (refer to figure in point 2). Please also select the type of safety catch.

### 4. Selection of accessories

The drawer cabinet can be combined with cover, base, wheels and push handle for mobile cabinets. Mobile cabinets must be fitted with a drawer safety catch.

### 5. Selection of partition material

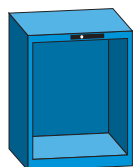

Partition material for drawers is usually ordered as a set. The available selection is large. Please note: The partition material must match the drawer height and useable dimension.

### 6. Determination of the price

The price of the drawer cabinet corresponds to the sum of all selected elements in the corresponding configuration.

## The Lista drawer safety catch

### Standard

Standard model without drawer-locking facility.

### Safety catch on the right

Mobile cabinets must be fitted with a drawer safety catch. Prevents unintended opening of drawers even when the cabinet is not locked.

### Safety catch on the right and left as well as double safety catch

Increased safety for use on mobile equipment. Safety catch right and left, operated with both hands. Double catch centrally operated with one hand.

### Lilo locking device

The Lilo locking device (Lock-in – Lock-out) blocks the drawer in an open or closed state. A significant security and comfort benefit, especially for heavy loads.

## Lista Premium drawer cabinets

Width 1193 mm, depth 725 mm (64 x 36E)

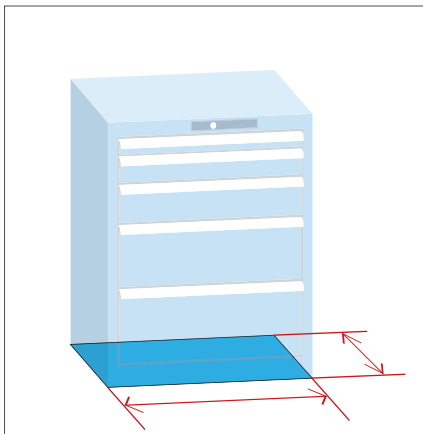

### Configuration examples

## Lista Premium drawer cabinets

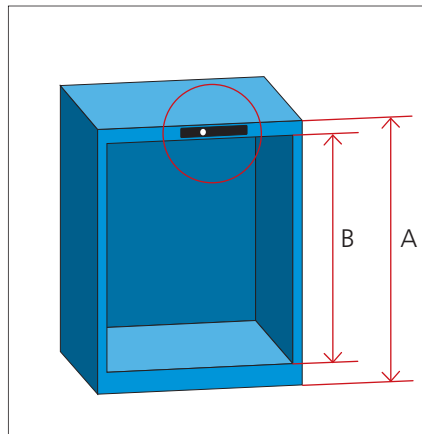

Width 1193 mm, depth 725 mm (64 x 36E)

**Configuration instructions: this is how to put your drawer cabinet together.**

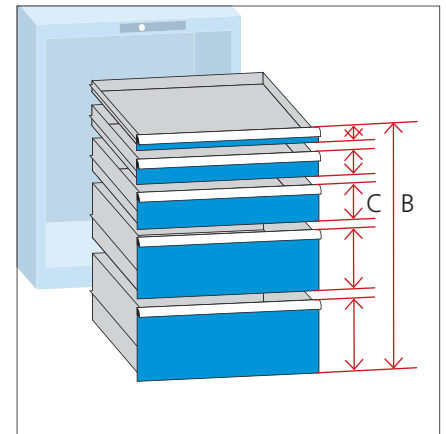

### 1. Selection of the cabinet base area

The first step is the selection of the cabinet base area. It can be indicated in millimetres (width x depth) or Lista units (E x E). The measurements E x E indicate which drawers match which housings.

### 2. Selection of housing and locking system

After selecting a base area you can specify the housing. Different heights are available for every floor plan. The selection of housing always includes the choice of the desired locking system and colour.

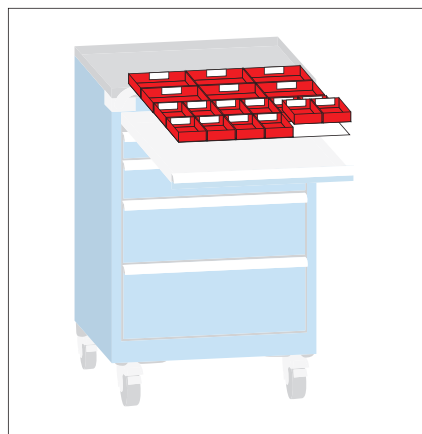

### 3. Selection of drawers

Determine the front height, carrying capacity, and colour of the drawers. The sum total of the front heights C must correspond to the clear height B (refer to figure in point 2). Please also select the type of safety catch.

### 4. Selection of accessories

The drawer cabinet can be combined with cover, base, wheels and push handle for mobile cabinets. Mobile cabinets must be fitted with a drawer safety catch.

### 5. Selection of partition material

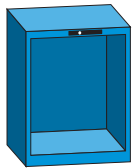

Partition material for drawers is usually ordered as a set. The available selection is large. Please note: The partition material must match the drawer height and useable dimension.

### 6. Determination of the price

The price of the drawer cabinet corresponds to the sum of all selected elements in the corresponding configuration.

### The Lista housing locks

#### Key Lock

Standard closure with central locking system and Lista cylinder lock, individual lock, with 2 keys.

#### Code Lock

Electronic locking system, a number combination replaces the key. Programmable user codes allow a flexible locking system to be created. Battery powered.

#### Remote Lock

Electronic locking system with hand-held radio transmitter (unlocking through radio pulse). A programming key grants access and authorisation. Interlinking of cabinets possible using interlink elements. Connects to main supply (adapter necessary). Please note: hand-held radio transmitter, programming key and adapter not included. Can be ordered optionally if required.

#### Remote Lock Mobile

Same functionality as Remote Lock, but with rechargeable battery (requirement for mobile model). Hand-held radio transmitter and programming key not included. Can be ordered optionally if required.

#### Lock without cylinder

Lock to be included in complete locking systems (simultaneously or main locking systems). For cylinders ordered with predefined lock numbers (2C 1 – 2C 6) or a freely defined number (2C \_). Should a cylinder not be ordered, the housing will be supplied with a lock cover.

For further information on locking systems see page 17.

**Configuration instructions: this is how to put your drawer cabinet together.**

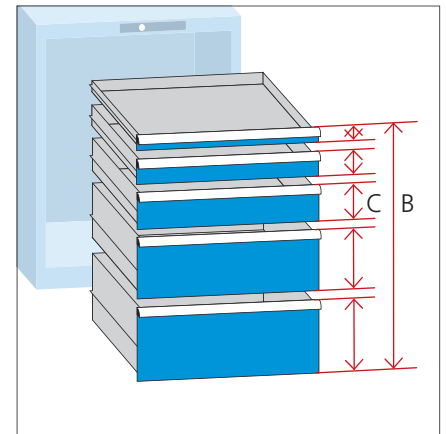

### 1. Selection of the cabinet base area

The first step is the selection of the cabinet base area. It can be indicated in millimetres (width x depth) or Lista units (E x E). The measurements E x E indicate which drawers match which housings.

### 2. Selection of housing and locking system

After selecting a base area you can specify the housing. Different heights are available for every floor plan. The selection of housing always includes the choice of the desired locking system and colour.

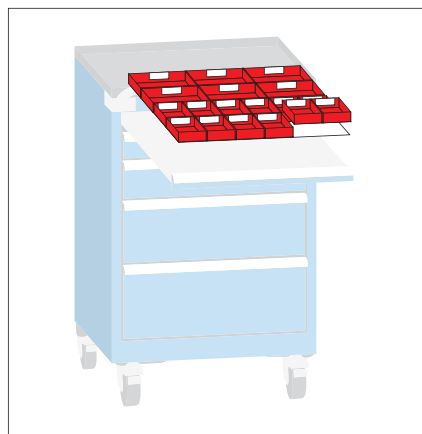

### 3. Selection of drawers

Determine the front height, carrying capacity, and colour of the drawers. The sum total of the front heights C must correspond to the clear height B (refer to figure in point 2). Please also select the type of safety catch.

### 4. Selection of accessories

The drawer cabinet can be combined with cover, base, wheels and push handle for mobile cabinets. Mobile cabinets must be fitted with a drawer safety catch.

### 5. Selection of partition material

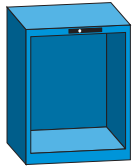

Partition material for drawers is usually ordered as a set. The available selection is large. Please note: The partition material must match the drawer height and useable dimension.

### 6. Determination of the price

The price of the drawer cabinet corresponds to the sum of all selected elements in the corresponding configuration.

## Drawer cabinets Lista Premium

Width 1431 mm, depth 725 mm (78 x 36E)

### The Lista housing locks

#### Key Lock

Standard closure with central locking system and Lista cylinder lock, individual lock, with 2 keys.

#### Code Lock

Electronic locking system, a number combination replaces the key. Programmable user codes allow a flexible locking system to be created. Battery powered.

#### Remote Lock

Electronic locking system with hand-held radio transmitter (unlocking through radio pulse). A programming key grants access and authorisation. Interlinking of cabinets possible using interlink elements. Connects to main supply (adapter necessary). Please note: hand-held radio transmitter, programming key and adapter not included. Can be ordered optionally if required.

#### Remote Lock Mobile

Same functionality as Remote Lock, but with rechargeable battery (requirement for mobile model). Hand-held radio transmitter and programming key not included. Can be ordered optionally if required.

#### Lock without cylinder

Lock to be included in complete locking systems (simultaneously or main locking systems). For cylinders ordered with predefined lock numbers (2C 1 – 2C 6) or a freely defined number (2C \_). Should a cylinder not be ordered, the housing will be supplied with a lock cover.

For further information on locking systems see page 17.

## The Lista drawer safety catch

### Standard

Standard model without drawer-locking facility.

### Safety catch on the right

Mobile cabinets must be fitted with a drawer safety catch. Prevents unintended opening of drawers even when the cabinet is not locked.

### Safety catch on the right and left as well as double safety catch

Increased safety for use on mobile equipment. Safety catch right and left, operated with both hands. Double catch centrally operated with one hand.

### Lilo locking device

The Lilo locking device (Lock-in – Lock-out) blocks the drawer in an open or closed state. A significant security and comfort benefit, especially for heavy loads.

## Lista Premium workbenches

Here, everything has its right place

**You and your employees need room for careful working. Requirements differ depending on the area of application. A flexible system meets your needs in regard to quality, efficiency and load: the modular workbench system, Lista Premium.**

### **A broad range of combination possibilities**

Save space, make room, utilise every square centimetre and set up surroundings under and over the work surface which are oriented towards the entire work process. The planning of your workstations is determined very strictly by the needs you define. The selection available on the way to an optimum workstation is extremely broad. It's worth viewing your own needs from the perspective of our specialists. We will be happy to assist you in your order with advice and help.

### **Ergonomic information**

Whether considering the rear panel, working height or labelling: Lista Premium guarantees you an ergonomic workplace designed according to the most up-to-date information.

# Listra Premium workbenches

## Tailor-made for your work

### Workbench leg assemblies

Uniform structural load-bearing capacity is 400 kg. The strong sheet steel construction of our workbenches can take a lot. It was developed by Lista for the attaching of workbench tops, storage shelves and floor anchors. If requested we offer a height-adjustable variation.

### Support pillars

Bearing function: Lista support pillars are mounted directly on the tabletop or stabilisation profile using the included fastening materials (only for bench depth 800 mm). The support pillars made of steel profiles are designed for the holding of components. Plain shelves, container strip mountings or rear panels are available to choose from.

### Shelves with raised edging

More area: The MDF board with three-sided, 8 mm protruding beech raised edging has a colourless priming all round. With the matching bracket made of rectangular steel tubing, your work surface can be additionally vertically adjusted to four levels.

### Drawer cabinets

Everything ready to hand: Proven Lista drawer cabinets are an ideal addition to your workbench.

### Plain shelves and dividers

We offer smooth shelves and also slotted plain shelves for partitioning with dividers. You can also order slip-resistant ribbed mats.

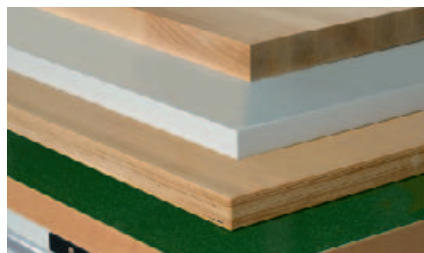

### Container strip mountings and storage bins

These strip mountings can be hooked in simply and are suitable for polyethylene storage bins of the sizes 2, 3 and 4.

### Rear panels

Create more space quickly: Lista rear panels can be hung on the support pillars without screws. Rear panels are perforated to hold tool holders and hooks.

### Diverse tops

Multiplex, beech, urphen or hard laminate tops are available. You'll find a suitable top surface with us for every purpose, each with its own special characteristics and advantages (refer to page 106).

### Storage shelves

The multiplex top for your storage shelf is pre-drilled and includes fastening materials.

## Lista Premium workbenches

### The workbench tops

#### Multiplex top

This workbench top, made of steamed beech veneers, is suitable for general purpose work. It is glued in multiple layers and waterproof. The edges are bevelled, the surfaces are sanded and oiled. The top is splash-proof, dirt-repellent and largely insusceptible to oil and grease.

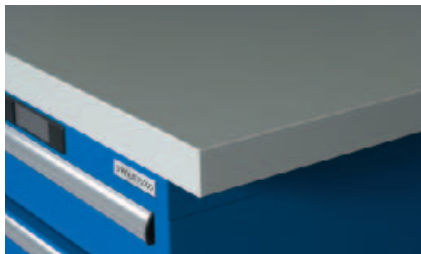

#### Urphen top

If you need an assembly or inspection station in your workshop, then the workbench top made of pressure-resistant, durable urphen with scratchproof UV coating is the right one for you. Urphen is very durable, splash-proof, dirt-repellent and insusceptible to oil or grease.

#### Beech top

This workbench top, made of steamed beech beams is suitable not only just for heavy-duty work in steel and machine construction, but also as a work surface in metalworking shops, automobile workshops or in schools. It is glued waterproof, the edges are bevelled, the surface is sanded and waxed. The beech top is splash-proof, dirt-repellent and largely insusceptible to oil and grease.

#### Hard laminate top

In the laboratory, electronics area, for the office and desks you can depend on our hard laminate top. It is resistant to most chemicals. Its structured surface is easy to clean. The upper surface with hard laminate is 0.7 mm thick.

#### The following variations are also available:

The multiplex top is also available with a chrome steel surface. Besides for the hard laminate top, a steel edge protection and a rear panel is optionally available for each.

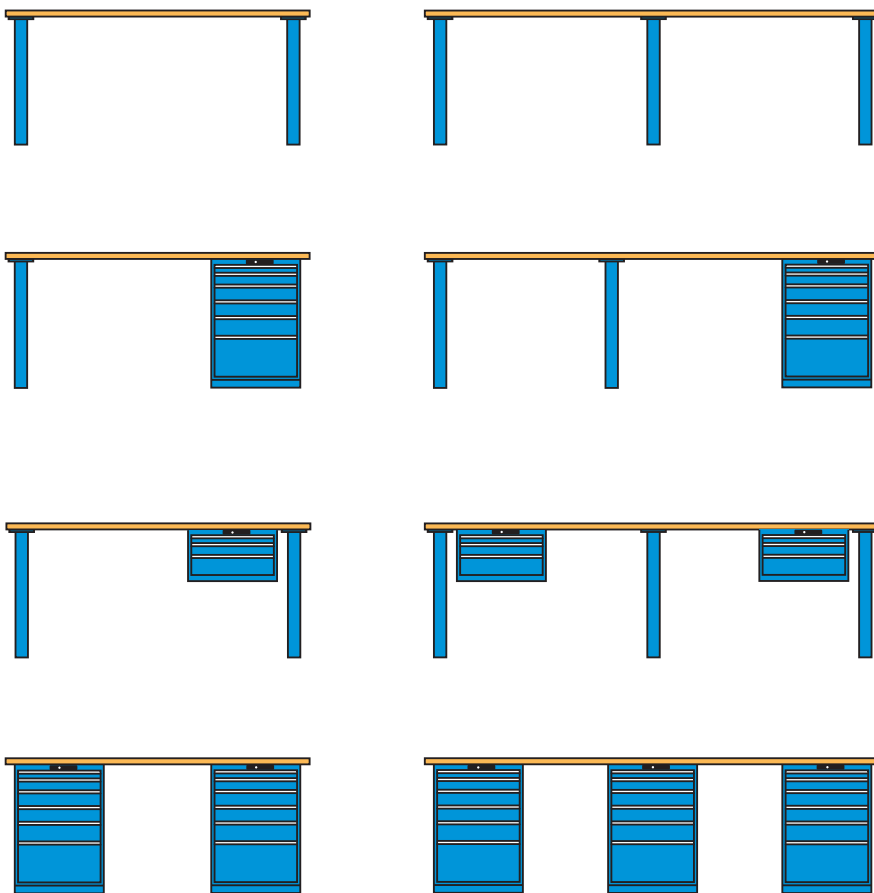

#### Note:

Wood is a natural product. Colour deviations may occur. In conditions of temperature fluctuations or changing humidity, warping of the beech top may take place.

# Listra Premium workbenches

## Combination possibilities

Our workbenches can be combined with various drawer cabinets (hanging or standing). Here we offer an overview of the diverse possibilities.

The following combinations of workbench leg assembly and drawer cabinets are possible:

Length mm								
1500	•	•	•	•				
2000	•	•	•	•				
2500				•	•	•	•	
3000					•	•	•	•

The uniform drill-hole scheme of the workbench tops makes many substructure combinations possible. Drawer cabinets with the sizes 27 x 27E, 27 x 36E and 36 x 36E can be positioned both on the left and right. Workbench tops come including both pre-assembly and fastening materials.

## Lista Premium workbenches

### Which drawer cabinet goes with which workbench?

The following tables show which drawer cabinet base area, at which height – either standing or hanging, can be combined with which workbench depth:

Drawer cabinet width 564 mm, depth 572 mm (27 x 27E)

Height mm	Clear height mm	Workbench depth 700 mm	Workbench depth 750 mm	Workbench depth 800 mm
283	200	Hanging		
383	300	Hanging		
533	450	Hanging		
650	550	Standing*		
700	600	Standing		
800	700	Standing		
850	750	Standing		
1000	900	Standing		

Drawer cabinet width 564 mm, depth 725 mm (27 x 36E)

Height mm	Clear height mm	Workbench depth 700 mm	Workbench depth 750 mm	Workbench depth 800 mm
283	200		Hanging	Hanging
383	300		Hanging	Hanging
533	450		Hanging	Hanging
650	550		Standing*	Standing*
700	600		Standing	Standing
800	700		Standing	Standing
850	750		Standing	Standing
1000	900		Standing	Standing

Drawer cabinet width 717 mm, depth 725 mm (36 x 36E)

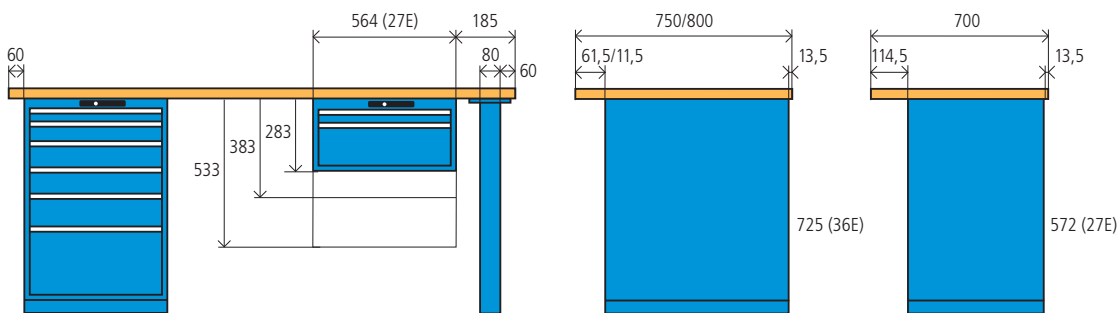

Height mm	Clear height mm	Workbench depth 700 mm	Workbench depth 750 mm	Workbench depth 800 mm
700	600		Standing	Standing
800	700		Standing	Standing
850	750		Standing	Standing
1000	900		Standing	Standing

\* Drawer cabinet standing; the height 650 mm for a workbench in combination with a leg assembly is only possible with an additional housing base (height 50 mm or 100 mm).

## Lista Premium workbenches Configuration examples

# Listra Premium workbenches

## Configuration instructions

This is how you put your workbench together.

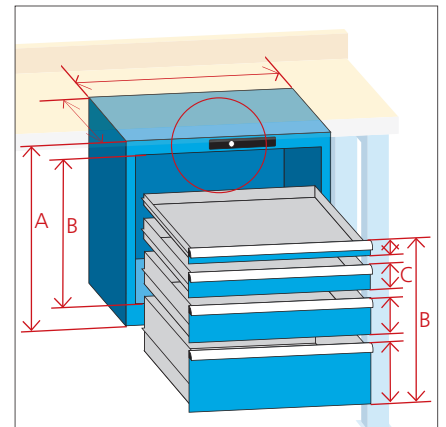

### 1. Selection of the worktop

Select your workbench top with the desired size and materials.

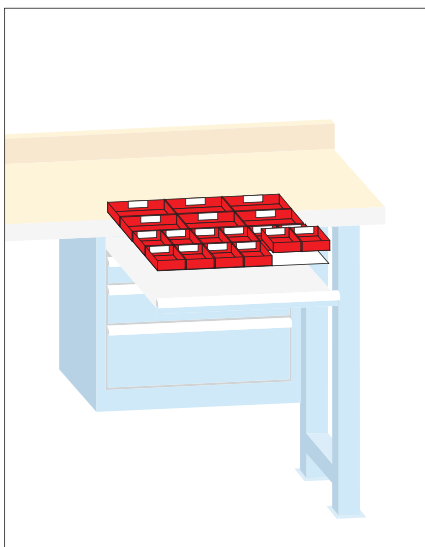

### 2. Selection of substructure

Decide on a suitable substructure, with or without drawer cabinet, with an appropriate height (also possible hanging from worktop).

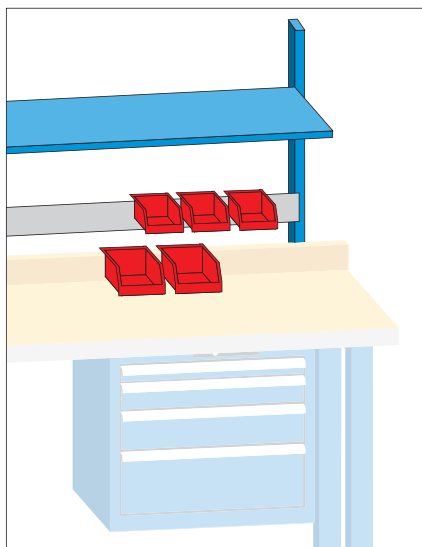

### 3. Selection of the drawer cabinet and drawers

Equip your drawer cabinet as needed. Please also note the configuration tips on the cabinet pages of this catalogue.

### 4. Selection of partition material

Equip your drawer cabinet completely according to your wishes – individually, drawer for drawer (refer to page 145).

### 5. Selection of the superstructures

Add appropriate accessories from this catalogue to your workbench. Simply ask your Lista partner if you have any questions.

### 6. Determination of the price

The price of the drawer cabinet equals the sum of all selected elements in the configuration made according to your choices.

## Workbench tops Lista Premium Multiplex

## The Lista housing locks

### Key Lock

Standard closure with central locking system and Lista cylinder lock, individual lock, with 2 keys.

### Code Lock

Electronic locking system, a number combination replaces the key. Programmable user codes allow a flexible locking system to be created. Battery powered.

### Remote Lock

Electronic locking system with hand-held radio transmitter (unlocking through radio pulse). A programming key grants access and authorisation. Interlinking of cabinets possible using interlink elements. Connects to main supply (adapter necessary). Please note: hand-held radio transmitter, programming key and adapter not included. Can be ordered optionally if required.

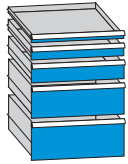

### Lock without cylinder

Lock to be included in complete locking systems (simultaneously or main locking systems). For cylinders ordered with predefined lock numbers (2C 1 – 2C 6) or a freely defined number (2C \_). Should a cylinder not be ordered, the housing will be supplied with a lock cover.

For further information on locking systems see page 17.

### The Lista drawer safety catch

#### Standard

Standard model without drawer-locking facility.

#### Safety catch on the right

Mobile cabinets must be fitted with a drawer safety catch. Prevents unintended opening of drawers even when the cabinet is not locked.

#### Safety catch on the right and left as well as double safety catch

Increased safety for use on mobile equipment. Safety catch right and left, operated with both hands. Double catch centrally operated with one hand.

#### Lilo locking device

The Lilo locking device (Lock-in – Lock-out) blocks the drawer in an open or closed state. A significant security and comfort benefit, especially for heavy loads.

## The Lista housing locks

### Key Lock

Standard closure with central locking system and Lista cylinder lock, individual lock, with 2 keys.

### Code Lock

Electronic locking system, a number combination replaces the key. Programmable user codes allow a flexible locking system to be created. Battery powered.

### Remote Lock

Electronic locking system with hand-held radio transmitter (unlocking through radio pulse). A programming key grants access and authorisation. Interlinking of cabinets possible using interlink elements. Connects to main supply (adapter necessary). Please note: hand-held radio transmitter, programming key and adapter not included. Can be ordered optionally if required.

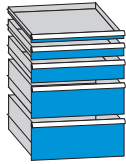

### Lock without cylinder

Lock to be included in complete locking systems (simultaneously or main locking systems). For cylinders ordered with predefined lock numbers (2C 1 – 2C 6) or a freely defined number (2C \_). Should a cylinder not be ordered, the housing will be supplied with a lock cover.

For further information on locking systems see page 17.

## The Lista housing locks

### Key Lock

Standard closure with central locking system and Lista cylinder lock, individual lock, with 2 keys.

### Code Lock

Electronic locking system, a number combination replaces the key. Programmable user codes allow a flexible locking system to be created. Battery powered.

### Remote Lock

Electronic locking system with hand-held radio transmitter (unlocking through radio pulse). A programming key grants access and authorisation. Interlinking of cabinets possible using interlink elements. Connects to main supply (adapter necessary). Please note: hand-held radio transmitter, programming key and adapter not included. Can be ordered optionally if required.

### Lock without cylinder

Lock to be included in complete locking systems (simultaneously or main locking systems). For cylinders ordered with predefined lock numbers (2C 1 – 2C 6) or a freely defined number (2C \_). Should a cylinder not be ordered, the housing will be supplied with a lock cover.

For further information on locking systems see page 17.

### The Lista drawer safety catch

#### Standard

Standard model without drawer-locking facility.

#### Safety catch on the right

Mobile cabinets must be fitted with a drawer safety catch. Prevents unintended opening of drawers even when the cabinet is not locked.

#### Safety catch on the right and left as well as double safety catch

Increased safety for use on mobile equipment. Safety catch right and left, operated with both hands. Double catch centrally operated with one hand.

#### Lilo locking device

The Lilo locking device (Lock-in – Lock-out) blocks the drawer in an open or closed state. A significant security and comfort benefit, especially for heavy loads.

Pre-assembly vice middle	<b>44.132.000</b> GBP 14.00
Pre-assembly vice right	<b>44.133.000</b> GBP 14.00

## Partition material as separate components

### Order with a system

Partition materials which we offer for Lista Premium drawer cabinets are available as complete sets and may be found in this catalogue with every drawer size. If these sets don't satisfy your requirements you can also order components separately.

#### Best flexibility

Through custom division of each individual drawer you achieve optimum use of space. The grid used with Lista drawers is the same for all cabinet types. The basic dimension is the unit 17 mm, which corresponds to the distance from slot to slot. Our partition materials are based on this basic dimension.

Using the groundbreaking, efficient labelling system, Lista Script, you can have your drawers and individual divisions labelled perfectly and individually.

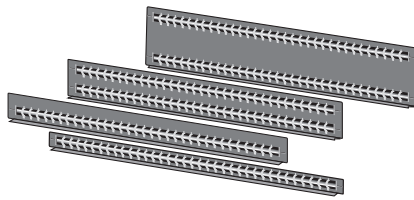

Lista partition materials create order with a system. For all business areas and every need.

#### Coordination to the drawer height

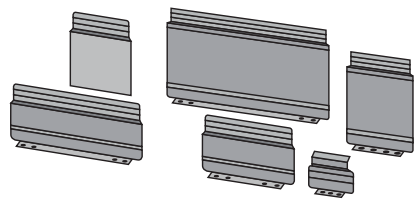

When selecting partition materials, care must be taken in each case that the height matches the drawer. For this, the front height of the drawer, for which the partition materials are suitable, is indicated in the selection tables.
