

ALC Green Range

Modular Attached Lid Containers

Green Range ALCs (Attached Lid Containers) incorporate an integral hinged lid and tamper-evident security to reduce losses and deter theft of high-risk or high-value goods in transit.

Features & Benefits

Versatile

- Modular solution; 300x200mm models stack 2-up (side by side) on 400x300mm ALCs, which in turn stack 2-up on 600x400mm ALCs.
- Seven sizes from 4 to 64 litres capacity

Product Protection

- Smooth internal surfaces & attached lid protect contents.
- Tamper-evident seals deter theft.

Ergonomics

- Wide contoured hand-holds
- Smooth surfaces.

Durable

- Strong and impact resistant.
- Containers typically stacked up to seven high carrying a unit load of up to 35 Kg.

Accurate identification

- Drop-in card holders
- Textured areas allow easy removal of adhesive labels.
- Recessed areas protect barcodes.
- Printing owner's logo and message promotes brand identity.

Economic & Ecologic

- Nesting by up to 76% saves valuable space on return transport.
- Unlike disposable packaging, Green Range ALCs can be used again and again - reducing carbon footprint and save money.
- 100% recyclable at the end of their long working life.

Textured area on ends and lid allow easy removal of adhesive labels without leaving a sticky residue

Integral lid cannot become separated from container and lost and inhibits theft when fitted with tamper-evident seals

Wide and comfortable hand-holds

Drop-in card label holders

Can be printed with owner's logo and message

Modular distribution solution; 300x200mm models stack 2-up (side by side) on 400x300mm ALCs, which in turn stack 2-up on 600x400mm ALCs.

No other name carries so much weight

80-litre attached lid container

The tough, secure distribution solution

LINPAC Allibert's 80-litre ALC (Attached Lid Containers) is ideal for a host of removals, storage and distribution applications

Features & Benefits

Product Protection

- Smooth surfaces and attached lid protect contents.
- Tamper-evident seals deter theft.

Ergonomics

- Wide contoured hand holds strategically placed to help reduce back injuries.
- Smooth surfaces.

Versatile

- Strong and impact resistant.
- Containers stack up to five high carrying a unit load of up to 50Kg - a combined load of 250Kg.
- Optional drainage holes in base ease de-nesting
- Wheeled dolly available

Accurate identification

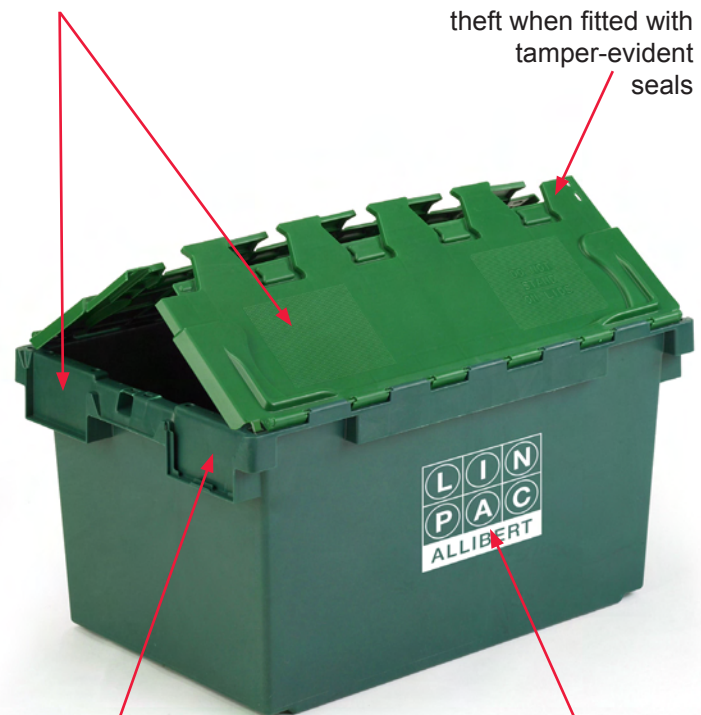

- RFID compatible.
- Tamper-proof drop-in card holders.
- Textured areas allow easy removal of adhesive labels.
- Printing owner's logo and message promotes brand identity.

Economic & Ecologic

- Nesting to 75% saves valuable space on return transport.
- Unlike disposable packaging, LINPAC Allibert containers can be used again and again helping you to comply with packaging waste legislation, reduce carbon footprint and save money.

DPCs

Two functions, one container

DPCs (Distribution Picking Containers) combine the ease of access required for order picking with the protection and security of an attached-lid container

Features & Benefits

Versatile

- DPCs combine an integral multi-fold lid with a sliding door, allowing access to the container when on racking, on shelving or stacked.
- Containers stack with lids closed and nest with lids open.

Product protection

- Smooth internal surfaces protect contents.
- Tamper-evident seals deter theft.

Identification options

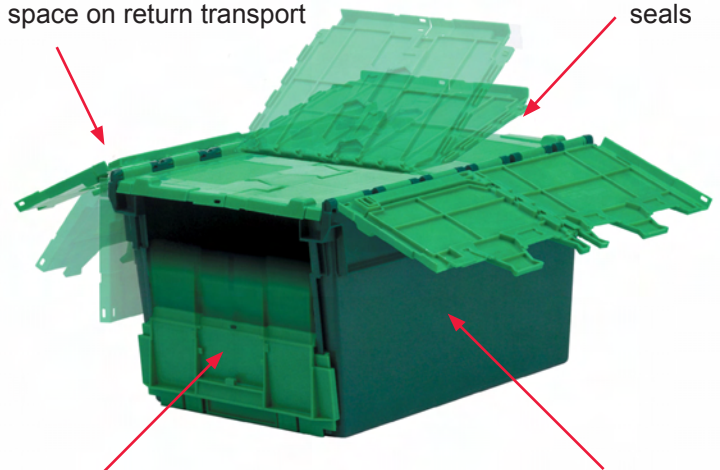

- Labelling options include:
 - drop-in card holder
 - pimple-pad allows easy removal of adhesive labels
 - recessed area protects barcode labels
- Printed with owner's logo and message promotes brand identity and prevents theft.
- RFID

Economic & Ecological

- Nesting by 65% saves valuable space on return transport.
- Unlike disposable packaging, DPCs can be used again and again helping you to comply with packaging waste legislation, reduce carbon footprint and save money.
- Distribution Picking Containers typically last for upwards of seven years in continuous loop, paying for themselves many times over.
- At the end of their working life they can be recycled, making new from old.
