

Euro Stacking Containers

The modular storage solution

Modular inter-stacking containers with vertical sides for maximum internal volume. All models inter-stack to form a compact storage unit.

Features & Benefits

Versatile

- Modular 300x200mm, 400x300mm, 600x400mm and 800x600mm base sizes.
- All models inter-stack; 400x300mm models stack 2-up (side-by-side) on 600x400mm containers, etc.
- Euro pallet compatibility; 600x400mm models stack 5 per layer on a 1200x1000mm pallet and 4 per layer on a 1200x800mm pallet.
- Ideal for use in fridges and freezers; ventilated models promote air flow, speeding cooling and helping to maintain a constant temperature.
- Optional lids, dividers, mobile dollies and label holders.

Secure

- Positive-fit secure stacking.
- Optional lids protects contents from dust & moisture.

Strong & tough

- Tough polypropylene or HDPE construction.
- Resistant to most chemicals and UV.

Hygienic

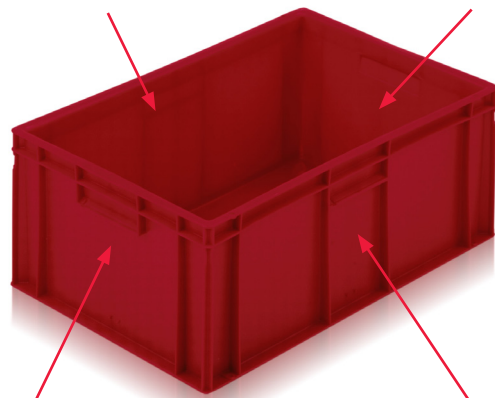

- Smooth surfaces are easy to clean.
- Withstands high temperature washing.

Economic

- Strong and tough, Euro stacking containers provide years of trouble-free service, paying for themselves many times over during their long life.
- Smooth surfaces protect contents from damage.

Vertical sides for maximum internal volume

Smooth hygienic surfaces inside and out

Solid or ventilated sides & base
