TM

 **armorgard**  
ticking every box.

The CuttingStation™ has been at the forefront of the Armorgard product development program. Working closely with other industry professionals and those on the tools, we have designed the CuttingStation™ to reduce noise, dust and vibration, and increase safety whilst cutting on site.

Significantly reduces  
noise (depending on the  
material you're cutting)

Significantly reduces  
dust (depending on the  
material you're cutting)

A go-anywhere, multi-purpose cutting station with unrivalled safety features to minimise vibration, sparks, noise and dust.

# cuttingstation™

™

Our ever-popular Armorgard CuttingStation™ is a neat, mobile workstation that eliminates the need for a separate cutting room and is essential for safely cutting lengths, such as conduit, timber, cable tray and pipe.

The new SS7 model is now even better! Improvements include new lighting and chamfered corners to further reduce noise. You'll also find a new expandable working area to accommodate mitre saws and cutaway sides for handling longer lengths. Improved support arms are now quicker and easier to change between four different configurations.

Integral health and safety features include rubber matting, fire-rated, noise-cancelling foam and PVC screens to contain sparks. Extraction and air filtration units can easily be fitted and a roomy, lockable cupboard provides secure storage. We've also recessed the plug sockets so they don't get knocked while you're wheeling the CuttingStation™ on to your next job.

## brand new features

### easier access

With cut-out front and more adaptable PVC curtains for easier access

### better support

New support arms give more options with 4 configurations, making it even easier to use

### more space

The unique extendable back creates a much bigger, safer workspace. Now suitable for mitre saws as well as metal cut-off saws

Our brand new model of the CuttingStation™ is packed with unique first-class features, a step up from the SS3.
