

Easily
 installed,
 cost-effective
 and versatile

- Palletstor is one of the most widely used pallet racking systems available today
- Easily installed, cost-effective and versatile
- Allows direct access to each pallet stored
- A wide range of sizes and duties for standard frame uprights and beams available
- Flexible system to meet design criteria in terms of load volume and weight, accessibility, handling requirements and space utilisation

DATA SHEET

PALLETSTOR PALLET RACKING

Space Efficient Pallet Storage

Palletstor

Pallet Racking

Beams can be removed and repositioned when changes in the use of the racking occur. Although Palletstor is adjustable, once the beams are slotted into position in the frame uprights, an inter-locking structure of great strength and rigidity is maintained.

Each beam is supplied complete with a pair of steel Safety Locking Pins. When located they ensure the beam is correctly positioned and help prevent the beam being dislodged during use.

box beams

Manufactured from a pair of interlocking 'C' sections, for strength and efficient material utilisation.

The Palletstor system includes a range of eight pallet support beams, with steel sections of varying thickness. This allows the design of racking systems which cater safely and cost-effectively for the widest range of load requirements.

shelving & open beams

Manufactured from formed steel sections, 'stepped' shelving beams (2BST & 4BST) are used to support steel shelf panels, chipboard or other shelving material. 2BB, 20BC, 30B & 40B beams provide a wider range of loading capabilities for shelf support.

Guide to colour finishes

Beams and Accessories

 High Visibility Yellow
House Colour

Uprights and Accessories

 Graphite Grey
BS 5252 18 A14

finish

Palletstor racking components are phosphate pre-treated, then powder coated (some items wet painted) and stove enamelled to give a glossy, durable high-quality paint finish. Bracing is galvanised. Customer's 'house' colours and galvanised finish available on request.

material

Palletstor components are made from high quality steel. Every stage in the manufacturing process is subject to stringent quality procedures, developed through years of experience.

Swatches shown give an approximate colour guide only. Standard colour for beams and some accessories is High Visibility Yellow. Standard colour for frames and some accessories is Graphite Grey. Bracing is galvanised.
