

## Design diversity

### A suitable solution to every need

The configuration options in terms of size, equipment, locking, colour and drawer partitions are almost unlimited. For every working environment the drawer cabinets can be combined in a different arrangement to deliver optimal usage of the available space. They can always be extended, which means they have a long useful life. This increases the return on investment.

Configuration as a drawer cabinet

Configuration as a drawer cabinet with internal hinged door, pull-out and adjustable shelves

Configuration as a drawer cabinet with drawers, internal hinged door, pull-out and adjustable shelves

Configuration as a mobile drawer cabinet

Configuration as a picking trolley with raised edges and push-bar

All drawer cabinets can also be ordered and configured in an ESD version.

 For ESD information, see pages 758/759

## Extensive choice of free product colours

### 12 standard colours, 6 colour combinations

All products with colour variations are available in 12 standard colours and 6 colour combinations at no additional charge. The three-digit colour code (e.g. **010**) is part of the item number. Always add the desired colour code when submitting your order (e.g. **70.701.010**). Housings and Drawers can also be ordered in different colours.

An additional 12 pre-defined colours are available at additional cost

### Your choice of colour on request

Lista can meet any specific colour request. In addition to the existing standard and pre-defined colours, it is also possible to manufacture your desired product in any colour you choose.

These colour samples may deviate from the original colour due to the printing process.

### i Benefits

- Impact- and abrasion-resistant housing surface thanks to environmentally friendly powder coating
- Total corrosion protection of drawers thanks to electrophoretic dip-painting

## Lista Units (E) The clever measurement system

As a practical grid measure, Lista Units (E's) provide a simple way of classifying housings, drawers and partition materials. **A Lista-Unit (E) is 17 mm** and is based on the grid for assigning partitions in drawers. Drawer cabinet housings and the drawers that fit in these housings use the same Lista Units, although they have different dimensions.

Example 1:  
Cabinet base area  
**1023 x 572 mm:**  
6 x 9 E = **54 E** (width)  
3 x 9 E = **27 E** (depth)

When selecting a drawer cabinet, the first thing that needs to be determined is the size of the base surface. There are 11 base surfaces, 2 depths and up to 7 widths to choose from.

**D ↗ 27 E**

**D ↗ 36 E**

The selected base area defines the usable area of the drawers. For each of these both millimetre measurements and Lista Units (E's) are given. Thanks to our universal measurement system the partition material can also be used across the entire Lista range using the Lista scale.

Lista Units	Depth 27 E			
	<b>18 x 27 E</b>	<b>27 x 27 E</b>	<b>36 x 27 E</b>	<b>54 x 27 E</b>
