

Mini & Maxi Boxes

for completely enclosed storage

The whole of the 2.200 mm wide elevation can be opened for moving goods into and out of the box.

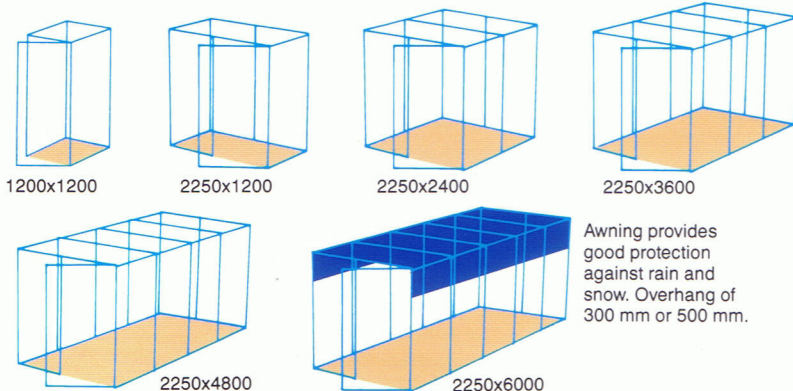

A Fast and Simple Method to Minimise Pilferage
A Fast and Simple Means of Eliminating Vandalism
Contents fully visible through the wire netting.
Sturdy design.
Hot-dip galvanized for outdoor applications and painted for indoor use.

Offers secure storage of theft-prone goods or materials that demand extra security. Simple to install outdoors or indoors. Just as easy to expand, reduce in size, dismantle and move. The Mini-Box measures 1200x1200 mm and consists of three standard sections, a door and a roof. The box can then be expanded to any required size.

Product specification:

Mesh: 50x70 mm
Wire diameter: 4 mm horizontal
3 mm vertical
Frame cross-section: □ 30x20 mm
□ 25x25 mm
Surface treatment: Hot-dip galvanized for outdoor applications. Tough grey RAL 7037 powder coating for indoor use. Other RAL colours are also available.
