Roll Forward Skip On Legs With Plastic Bucket - RFSP1 1L

This robust roll forward skip has a rotationally moulded polyethylene bucket attached to a painted steel chassis on legs and the plastic bucket can be replaced as and when required making this roll forward skip ideal for robust application such as those found on construction sites.

To discharge the contents at ground level you simply pull the release handle which is further fitted with a pull cord so that you can discharge the contents into a waste skip or the back of a truck from the safety of the ground. As standard the unit is supplied with safety chains to secure it to a fork lift truck and reduce movement during use.

This unit will be delivered by an HGV, possibly articulated therefore please ensure that a vehicle of this type can access your premises before ordering and advise us accordingly.

You will require an appropriate size/capacity fork lift truck to offload this item from the delivery vehicle. Our standard delivery doesn't include any offloading.

This unit is not designed for use with wet sand, cement, concrete or other similar wet loads because of the potential to overload it and cause significant damage to the locking mechanism, which would affect your warranty rights.

SPECIFICATIONS

Length	1795mm
Width	1740mm
Height	192mm
Tare Weight	210kg
Max Load	1000kg
Nominal Volume	1.1m ³
