

Scudo is a completely freestanding partition that is ideal for separating welding areas. It is available in all steel or with a vision panel.

A range of vision panel options are available; toughened glass, laminated glass or polycarbonate. All these have the option of anit-glare film for added safety.

ADVANTAGES

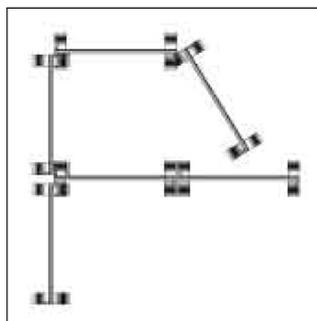

Overlapping feet provide exceptional stability as well as allowing flexible layout solutions.

With overlapping feet, Scudo has the ability to adapt to the needs of most welding areas.

APPLICATIONS

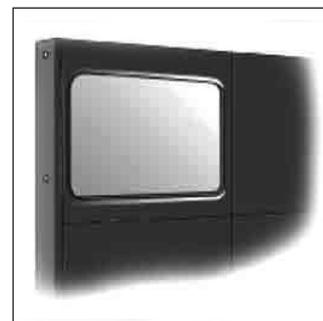

Being freestanding, Scudo can be easily moved to suit different applications.

Scudo provides scope for a range of enclosures to be constructed quickly and easily.

FEATURES

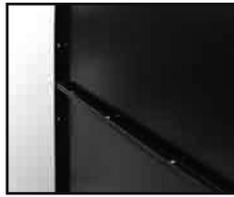

Vision panels can be supplied with an anit-glare film to allow safe viewing of welding areas.

Options are available for laminated glass, toughened glass and polycarbonate.

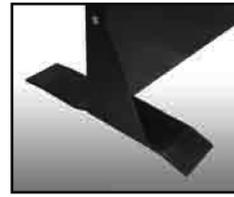

Panels have a durable powder coat finish 70 microns thick.

Panels are secured together using M8 bolts and Nylock nuts.

Anti glare film stops the harmful light from the welding process, making the area safe for viewing.

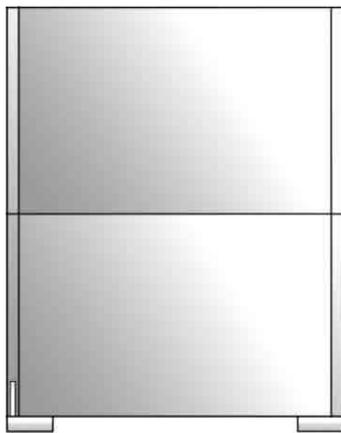

Unique foot design allows a high flexibility of layouts.

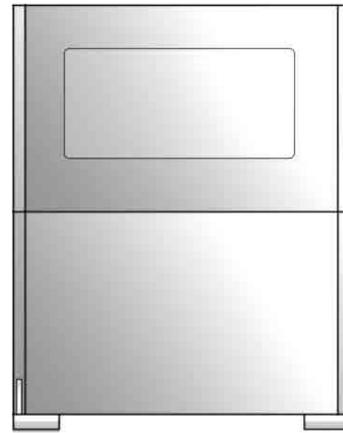

FACTS

Scudo is available in all steel or steel with a 1072mm x 618mm vision panel.

All steel

Steel with vision panel

Standard Scudo panel includes:
